Behind the Numbers
A Dataset on Spending, Accountability, and Recovery Measures included in IMF COVID-19 loans

What is this dataset?
To respond to the outbreak of the COVID-19 pandemic, the International Monetary Fund (IMF) has committed $1 trillion and as of September 20, 2020 had provided $89 billion worth of financial assistance to countries around the world. Oxfam has reviewed the publicly available IMF COVID-19 loan documents associated with 91 loans to 81 countries, extracting and collating select data from each loan document relevant to spending, accountability, and proposed recovery measures.

Why did we create this dataset?
There is an overwhelming amount of information available on the IMF’s website and associated with each loan. This particular dataset has been compiled for the benefit of persons and institutions wanting a snapshot view of what governments are borrowing, what they intend to do with these funds, and what policy measures the IMF is encouraging countries to take during the pandemic and in the recovery period. The intention is to shine more light on these agreements, find trends, provide citizens and civil society with a starter-kit to understand these loans better, and be able to hold governments and the IMF more accountable.

How is this dataset organized?
The dataset is organized alphabetically within region (using IMF regional groupings), and contains the following information:
Basic loan information: Columns 1 and 2 provide the date of loan approval, amount committed, and type of financing instrument used. See explanation on various loan types here and on the Catastrophe Containment and Relief Trust (CCRT) here.

Debt information: Column 3 provides the borrowing country’s debt situation at the time of publication, and links to the World Bank’s Debtor Reporting System for easy access to debt data for each country.

Spending measures: Column 4 provides extracts of select text related to fiscal policy measures governments intend to take or IMF advises them to take, particularly social spending aimed at responding to the COVID-19 crisis.

Accountability measures: Column 5 provides extracts of select text related to the transparency and anti-corruption measures countries have committed to undertake when receiving the loan.

Recovery measures: Column 6 provides extracts of select text related to proposed fiscal measures for the recovery period, including language related to proposed austerity, often manifested in fiscal consolidation measures, budgetary surplus targets, cuts to public wage bills, etc. Here you will also find policies related to proposed tax measures with a focus on Value Added Tax (VAT) measures in particular.

All text provided in this tracker are direct excerpts manually selected and extracted from publicly available official IMF reports including IMF press releases, staff reports, letters of intent, debt sustainability analyses, IMF Executive Director Statements, and Memorandums of Economic and Financial Policies where relevant. For more details or clarity, please refer to the original sources referenced for each respective country. This dataset is not intended to replace official IMF reports. The original IMF publications include further information on the issues covered in this dataset, cover a wider range of issues than is covered in this dataset, and remain the primary source of information on IMF COVID-19 financing and borrowing countries’ fiscal policy measures. Every effort has been made to verify the accuracy of the information contained in this dataset.
and all information is believed to be correct as of September 20th 2020. Nevertheless, Oxfam cannot accept responsibility for the consequences of its use for other purposes or in other contexts.

This dataset was commissioned by Oxfam and compiled by Nona Tamale.

acquisition has started; (xi) suspension of exports of essential goods for 30 days; (xii) regulated prices for an approved list of medical goods related to COVID-19.

Memorandum of Economic and Financial Policies (Attachment to the Letter of Intent)
Revenue and expenditure measures in the supplementary budget are as follows:

- **Non-oil revenue.** We are implementing non-oil revenue measures to bolster yield from the VAT (net of reimbursements), excise taxes, and PIT. Specifically, we reduced the amount of VAT remitted to the refund account. We introduced additional excise taxes on imported luxury cars and other revenue enhancing measures, such as increasing rates for cigarettes.

- **Wage bill.** We issued a Presidential decree to freeze hiring (except for essential oil revenue, in particular through enhanced VAT collection.

Memorandum of Economic and Financial Policies (Attachment to the Letter of Intent)
To achieve our medium-term central government public debt target of 60 percent of GDP, we will continue non-oil revenue mobilization and limit growth in current expenditure, while preserving priority public investment and scaling up the cash-transfer program for the most vulnerable...

Notwithstanding the economic headwinds, we remain committed to implementing new fiscal measures to restore fiscal and debt sustainability. Specifically, we introduced revenue and expenditure measures in order to mitigate the impact of the sharp fall in oil prices and economic growth, and to provide some fiscal space for COVID-19-related
social services) and practice attrition-based employment reduction, in order to achieve the wage ceiling of Kz 2.218 trillion in 2020.

- **Goods and services.** We are containing payments on goods and services, mostly through a freeze on non-priority expenses, such as travel, hotel, and real estate related spending, while creating space for higher COVID-19-related spending.

- **Transfers and subsidies.** Transfers and subsidies will be kept under tight control, while targeted social spending floors will be preserved. We are committed to increasing the efficiency and effectiveness of delivery of transfers, including subsidies, and intend to recoup substantial savings over and above the initial 2020 budget...

Building on tax reforms introduced in 2019 and 2020, we will continue to mobilize non-oil revenue through expanding the base of VAT; increasing the rates and progressivity of the PIT; reforming investment incentives for the corporate income tax (CIT); strengthening transfer pricing rules; improving property registration; and starting to integrate the informal sector. These reforms will be part of the 2021 budget...

After finishing the first phase of the subsidy reform in 2019, we started the pilot cash-transfer program in May 2020, with a view to reaching several hundreds of thousands of low-income households by end-2020. In all, the program targets 1.6 million households nationwide. After the COVID-19 crisis abates, we intend to launch the second phase of subsidy reform in 2021, by starting to raise public transportation...
### Benin
**Approved on May 15, 2020**

| Augmentation of ongoing [Extended Credit Facility (ECF)](http://datatopic.s.worldbank.org/debt/ids/DSSI-BEN.htm) SDR 76.01 million (equiv. to $103.3 million, 61.4% of quota) | Moderate risk of debt distress | **Staff Report**

The authorities have prepared an emergency package of new measures equivalent to 1.7 percent of GDP to address the emerging health crisis, provide relief to households, and support the economy. Within the budget envelope, the authorities have already reallocated some funds.

| **Staff Report (reiterated in the Letter of Intent)**

Sound public finance management is paramount in times of reprioritization of public policies. Once the size of the COVID-19 spending is fully assessed, the authorities will, most likely, need to prepare a supplementary budget to preserve fiscal sustainability, the increase in the fiscal deficit should be temporary and reversed after the shocks dissipate. The projections presented in the staff report assume that both shocks... | **Staff Report**

From 2021 onwards, the authorities plan to revert to the medium-term fiscal path. To... | tariffs and the prices of gasoline and diesel, with an ultimate objective of introducing an automatic fuel-pricing mechanism. We will evaluate the program of special subsidies for the purchase of fuel products by enterprises in the agriculture and fishing sectors in late 2020.

**Angola IMF ED Statement**

The authorities are determined to pursue their structural reform agenda. Once the pandemic subsides, they plan to remove fuel subsidies and increase public transport tariffs to ensure cost recovery.
Approved on April 13, 2020

CCRT Grant
SDR 7.43 million (equiv. to $10.17 million)

towards prevention measures.
Their new plan is based on a three-pronged strategy:
Health response. The budget envelope for public health expenditure will be increased by 0.7 percent of GDP to allow for the purchase of medical equipment and the construction of temporary health facilities and retention areas for quarantined people.

Transfers to households. One third of the plan will consist of transfers to vulnerable households representing above one quarter of the population. A system of cash wires through mobile banking building on ARCH (the new health insurance system) or channeled through the safety nets component of the World Bank ACCESS project is being considered. If technical constraints prevent its use, the authorities will resort to more traditional forms of transfer, such as food distribution programs and utility bill subsidies. Both cash transfers and subsidies are expected maintain budget transparency and ensure that all the new priorities are appropriated in 2020. This will mitigate the risks of off-budget spending and pressures on next year’s budget. Moreover, quarterly budget execution reports should highlight the state of implementation of the COVID-19 measures, their main outcomes, and the difficulties encountered.

The authorities are also committed to conducting an audit of their response plan next year, which will be independently carried out by the Accounting Chamber and made available to the public on its website. The authorities will also publish the procurement contracts of the main projects, indicating their amount and beneficiaries.

(pandemic and border closure with Nigeria) will wear off later this year. Under this assumption, the fiscal deficit should revert to the previous path and remain within the regional deficit ceiling of 3 percent of GDP. Staff also reemphasized the importance of making further progress on revenue mobilization in the medium term, given that Benin lags comparator countries in this area...

Letter of Intent
The increase in the fiscal deficit in 2020 in response to the COVID-19 pandemic is temporary and does not call into question our objective of keeping the fiscal deficit below the convergence criterion of the West African Economic and Monetary Union (WAEMU) of 3 percent of GDP from 2021 onwards.

The government is determined to continue its efforts aimed at strengthening tax administration and revenue mobilization, as well
to benefit the formal and informal sectors.

Support to impacted businesses. In addition to some flexibility with tax payment deadlines, targeted and temporary tax exemptions will be provided to businesses most affected by the crisis.

In the short term, the authorities could contemplate additional measures to support economic activity if the situation deteriorates relative to the baseline... in this case, further measures could be contemplated, such as (i) increasing the size or expanding the coverage of transfers to vulnerable households; (ii) improving access to credit for cash-constrained businesses through guarantees or subsidized loans; (iii) broadening the range of inputs or production factors concerned by cost-based tax incentives; (iv) accelerating government payments to private sector suppliers; and (v) reducing the turnover tax for micro and small

Debt Sustainability Analysis
The authorities concur broadly with staff’s assessment. The authorities remain committed to strengthening debt sustainability by adhering to medium-term fiscal consolidation, conducting sound public investment management, and enhancing debt management capacity.
Letter of Intent
Our response plan is organized around three core areas:
(i) an increase in health spending by CFAF 60 billion to cover the cost of purchasing medical equipment, the construction of temporary centers to care for people who are sick, and quarantine arrangements for at-risk populations;
(ii) a total of CFAF 50 billion to help the most vulnerable segments of the population through the strengthening of the ARCH program (Assurance pour Renforcement du Capital Humain, or Insurance for Strengthening Human Capital) and the ACCESS program (Appui aux Communes et Communautés pour l’Expansion des Services Sociaux, or Community and Local Government Basic Social Services) and various social transfers (covering more than 550,000 households) carried out by means of mobile banking services or, failing that, through the payment of water and electricity bills or the distribution of foodstuffs for these enterprises.
(iii) a CFAF 40 billion package to support struggling businesses through targeted and temporary tax exemptions and a relaxation of certain payment rules.

In order to finance this ambitious plan and address the revenue shortfall related to the economic shock, we are planning to raise additional resources in the domestic market as well as from donors. We anticipate an increase in domestic funding in the amount of CFAF 65 billion (0.7 percent of GDP)... At the same time, we will also take steps to reallocate CFAF 51 billion in non-priority spending in the budget (equal to 0.6 percent of GDP).

Healthcare measures: They comprise the preparation of a National Contingency Plan and the activation of an emergency plan as well as a response team with initial funding of CVE 76 million (0.04 percent of GDP) from the reallocation of budgetary appropriations to cover additional expenses for personnel, training and medical equipment.  
Social protection actions: For the most vulnerable, mitigating measures... comprise: (i) income compensation to provide financial support to individuals operating in the informal sector; (ii) social inclusion emergency measures for vulnerable people without income; (iii) social inclusion income, with support from the World Bank; (iv) support to microfinance institutions to support interest-free loans to vulnerable households and; (v) care for the elderly with food assistance and other financial support. Similar actions were | N/A | Letter of intent  
While government revenues have declined significantly, the government intends to undertake tax policy reforms and strengthen revenue administration to reverse the decline in revenue collection in the immediate aftermath of the crisis. On the expenditure side, the government will continue to reallocate non-priority current expenditures to help meet some of the additional spending needs arising from the pandemic while ensuring that our public investment program is not disrupted.  
The government remains fully committed to the objectives set out in the Policy Coordination Instrument program, even though some quantitative targets will need to be reassessed in the context of the next review. As soon as the crisis abates, we will continue to implement policies and reforms to increase domestic revenues and contain public spending to help strengthen the |
Carried out in the past in response to natural disasters.

Therefore, staff expects the selected measures to be well-targeted and effectively implemented. The authorities indicated that these measures... are temporary.

**Cabo Verde IMF ED Statement**

Health care spending, including the purchase of medical supplies and equipment, together with social protection are expected to increase by more than 1 percent of GDP.

Social protection measures include support to informal sector workers and the population with no income, as well as the elderly—in many cases, these groups were previously supported by remittances sent by relatives living abroad, but this source of income has now become uncertain.

The increase in healthcare and social expenditure will partially be compensated by reprioritizing capital spending and containing non-essential current spending.

Fiscal position, protect the peg, and reduce the debt burden.

improved case management. The plan aims to (i) strengthen epidemiological surveillance through mass screening; (ii) improve the provision of medical care to positive cases by upgrading hospitals’ technical capacities and supply of medications; (iii) mitigate the community spread of Covid-19 through social distancing; (iv) improve the coordination of Covid-19 measures. The plan’s total cost is estimated at CFAF 58 billion.

Measures to mitigate the negative financial impact of the COVID-19 pandemic on the most vulnerable include strengthening existing social safety nets and providing support to affected businesses and households. The measures will be spelled out in a global response plan that is currently under preparation.

to the results of public procurement awarded by the government and the beneficial ownership of companies receiving procurement contracts on COVID-19 related expenditures. In the meantime, such COVID-19 related expenditures are being incorporated in a supplementary budget in preparation and expected to be presented to the Parliament in June 2020.

Intent for the fifth review and committed to the ECF-supported program. However, the impact of the pandemic on the economic outlook and the accompanying restrictions make completing the sixth review of the ECF arrangement difficult at this juncture. Maintaining macroeconomic stability, strengthening the fiscal revenue base, improving spending efficiency, fostering good governance, and promoting the formal private sector are still key goals. The government will ensure that the support and assistance measures taken as part of the response to COVID-19 do not prejudice the mobilization of tax revenues in the medium and long term.

Cameroon IMF ED Statement
They plan to alleviate the large revenue losses in 2020 through strengthening the tax and customs administrations. Actions in this regard include... scaling up collection in 2021 as the crisis
| **Central African Republic** | **Rapid Credit Facility (RCF)** SDR 27.85 (equiv. to $38 million, 25% of quota) (direct budget support) | **High risk of debt distress** [http://datatopic.s.worldbank.org/debt/ids/DSSITables/DSSI-CAF.htm](http://datatopic.s.worldbank.org/debt/ids/DSSITables/DSSI-CAF.htm) | **Staff report** "... the authorities have adopted a number of measures to contain its spread and a response plan to strengthen the capacity of the country to cope with its impact. The response plan, costing about CAF 27 billion (2 percent of GDP), was prepared in collaboration with the World Health Organization (WHO), and aims at addressing some of the national health system’s main weaknesses in a more durable way."
In the short term, the primary objective of the response plan is to ensure that the C.A.R. health system is ready to face a domestic major outbreak of the Covid-19. To do so, the plan rolls out five strategic pillars. There are designed to strengthen the coordination and collaboration between the various sectors, improve the management and lab capacities, step up the prevention measures, improve the medical treatment of confirmed cases, and ensure that the C.A.R. health system is ready to face a domestic major outbreak of the Covid-19.

| **Approved on April 20, 2020** | **CCRT Grant** SDR 2.96 million (equiv. to $4.05 million) | **Letter of Intent** "... we will ensure that the additional external financing we are receiving is used effectively to address crisis-related needs and will undertake an independent audit of the crisis-mitigation spending after the crisis abates, whose results we will publish."

| **Approved on April 13, 2020** | **Staff report** The authorities intend to allow the fiscal deficit to increase to accommodate most of the fiscal impact of the pandemic, which will comprise a significant shortfall in revenue and additional outlays as part of the response plan. While they intend to streamline non-priority expenditures, this accommodative stance will allow them to continue meeting pressing social, infrastructure, and security spending needs.
The authorities have also reiterated their intention to pursue the policies and structural reforms to which they committed under the ECF arrangement approved last December... To ensure macroeconomic stability and debt sustainability while promoting sustained inclusive growth, they intend, as conditions permit, to pursue their efforts to enhance domestic revenue mobilization... |
cases and, finally, improve the communication and promote health...

The plan notably aims at:
(i) providing medical care of confirmed cases;
(ii) improving the monitoring system at the country’s main points of entry and;
(iii) improving the capacity of medical staff and facilities. This plan goes beyond an immediate response plan and includes measures to strengthen the capacity of the healthcare system to deal with such pandemics in the future.

estimated BOP financing gap through indirect budget support and would provide timely support to address the urgent fiscal needs emerging as a result of the pandemic.

in remote regions that are not covered. These efforts will put pressure not only on government resources but also on an already weak health system.

Chad has a weak and fragile public health system. Public health capacities are generally constrained, with deficient medical equipment and trained personnel, as well as limited territorial coverage. Urgent upgrades to the healthcare system will be needed to respond to a pandemic. Accordingly, increased demand for health-related services would require substantial donor financial and technical support...

In their efforts to contain the pandemic, the authorities will increase health-related spending by about 0.3 percent of non-oil GDP (CFAF 15 billion) of which 60 percent is expected to be financed by donors. A detailed contingency plan was put in place by the ministry of health in mid-March, to mitigate the impact of the pandemic. It includes training of medical and technical best budget management practices to which we have always adhered.

implement the needed adjustment measures as soon as the current crisis abates.
staff, purchase of necessary medical equipment, the construction of seven health centers in remote areas, the construction of three mobile hospitals, and securely managing entry points.

Measures will also be taken to alleviate the hardship on households, including temporary suspension of payments of electricity and water bills, and the establishment of a Youth Entrepreneurship Fund.
| Chad (2 of 2) Approved on July 22, 2020 | **Rapid Credit Facility (RCF)**  
SDR 49.07 million (equiv. to $68.49 million, 35% of quota)  
**ECF arrangement** which was due to expire in September 2020 is cancelled.  
The RCF disbursement of SDR 49.07 million, is expected to fill 10.9 percent of the estimated BOP financing gap through indirect budget support. | **Press Release**  
The second RCF will provide a timely support for the implementation of the authorities’ additional measures, to address the COVID-19 crisis and mitigate its severe impact.  
**Staff Report**  
A national contingency plan was put in place in March to contain the impact of the pandemic at a current estimated cost of CFAF 37.0 billion... of which CFAF32.4 billion were executed.  
The authorities have also stepped up their efforts to support households. Measures approved at the time of RCF-1 included:  
(i) the temporary suspension of payments of electricity and water bills,  
(ii) clearance of arrears on death benefits due to deceased civil and military agents, indemnities and ancillary wages owed to retirees, and medical expenses for civilian agents and defense and security forces. | **Staff Report (reiterated in Letter of Intent)**  
The authorities will strengthen transparency around all COVID-related expenditures, which will help ensure that the financial assistance received is efficiently spent. A trust fund, in the form of a dedicated Treasury account, was established to mobilize financial contributions to fight the pandemic.  

To ensure transparency, the authorities will report all COVID-19 related spending in the supplementary budget. In addition, the authorities will publish the full text of procurement contracts on the website of the Ministry of Finance and Budget, including the names of the beneficial owners of awarded legal persons, within 30 days of their conclusion.  
They will also subject all emergency spending...  
**Chad IMF ED Statement**  
Over the medium-term, they will pursue fiscal consolidation, including through unwinding the temporary COVID-19-related measures and step up domestic revenue mobilization, with a view to preserving fiscal and debt sustainability consistent with the related CEMAC convergence criteria. | **Staff Report**  
Given the negative impact of the twin shocks, the authorities will temporarily loosen fiscal policy to accommodate the significant revenue loss and the temporary emergency spending measures. As the crisis abates, fiscal adjustment will be needed, particularly since oil prices are expected to remain low, including by allowing temporary expenditure measures to expire. This would necessitate strengthening domestic revenue mobilization and rationalizing spending while protecting poverty reducing expenditure... |
Since RCF-1, the authorities adopted the following additional measures:
(i) introduction of a food distribution program with the help of UN agencies,
(ii) tax exemptions and simplification of the import process for food and necessity items, including health equipment,
(iii) the creation of a solidarity fund for the vulnerable population amounting to CFAF 100 billion, and
(iv) the adoption in early May by the National Assembly of a new law that establishes a Youth Entrepreneurship Fund.

**Chad IMF ED Statement**
The government’s COVID-19 contingency plan focused on supporting vulnerable populations, as well as businesses and affected sectors such as agriculture, since then progress has been encouraging. However, the implementation of the plan has proved to be more difficult and costlier than expected thereby exerting strong pressures on public finances. The execution of procurement procedures to the health and other sectors to an ex-post compliance audit by a reputable international auditing firm, which will be conducted with the support of the Inspectorate of Public Finances within six months of the end of the fiscal year. The audit will also cover all COVID-related expenditures. Delivery reports for goods and services will be published on the website of the Ministry of Finance and Budget within three months of the end of the execution period for each contract.
agreements with unions and

| Comoros | Approved on April 22, 2020 | Rapid Credit Facility (RCF) | SDR 2.97 million (equiv. to $4.05 million, 16.7% of quota) | http://datatopics.worldbank.org/debt/ids/DSSITables/DSSI-COM_files/sheet001.htm | Staff Report |
The COVID-19 shock comes on the heels of two difficult years for Comoros, and less than a year after Cyclone Kenneth, which necessitated emergency Fund financial support in 2019...

The authorities have prepared a Letter of Intent

We are keen to ensure that the best possible use will be made of the funds provided by the IMF and to that effect, we will enhance mechanisms of reporting and controls for the disbursement of funds...

Staff Report

To the extent possible, the authorities should ensure that fiscal policy cushions the adverse effects [of] the COVID-19 shock before bringing the fiscal position back in line with medium-term paths once the crisis has passed.
| Approved on April 13, 2020 | Rapid Financing Instrument (RFI) SDR 5.93 (equiv. to $8.08 million, 33.3% of quota) | Medium overall risk of debt distress | plan that describes the measures to be taken to minimize the risk of the pandemic, drawing on WHO recommendations. The cost of the plan is estimated at US$2.2 million, and two donors have indicated that they will provide this financing. However, implementation appears to be proceeding only slowly, for example as concerns the identification and preparation of centers for the quarantine and treatment of infected persons...

The authorities intend to fully implement their pandemic preparedness plan, including for example by creating and equipping quarantine centers. Implementation currently suffers from lack of funds, as promised aid has not yet been disbursed. Beyond this, financing sources permitting, the authorities’ priority will be to substantially expand spending on health care in line with pandemic-related needs, trying to overcome to the greatest extent possible the health care system’s capacity constraints...

We commit to report quarterly on the spending of these funds and to commission an independent and robust third-party audit of this spending in about a year’s time and publish its results.

The Government will also publish regularly on its website dedicated to public procurement documentation on large public procurement projects, together with ex-post validation of delivery along with the name of awarded companies and the name of their beneficial owner(s). The Government expects that this website will be operational within six months. The Government will start publishing the information on its general website in case the website dedicated to procurement should become operational only with a delay. | Comoros IMF ED Statement

Once the effects of the global pandemic recede, the authorities will resume their policies aimed at enhancing macroeconomic stability and creating the necessary conditions for higher, sustainable and more inclusive growth. |
On the spending side in 2020, key measures include the following: the authorities intend to raise spending on health care by 2 percent of GDP (reflected in higher current spending). Further, the authorities intend to provide income support to SOE workers who have seen their hours reduced (at a cost of 0.1 percent of GDP, to be saved elsewhere in current spending, for example through civil service hiring restraint). To the extent possible within financing and implementation constraints, the authorities may also provide support to the poor through direct cash transfers (not factored into projections as this measure is not firmly planned). If impossible due to implementation constraints, the authorities may instead support poor communities through free water or electricity supplies...

In addition to expanding healthcare resources, the authorities could consider giving targeted and temporary support for affected

to disburse US$200 million in direct budget support through an emergency DPO.

... given spending pressures from the free education initiative and delays in revenue reforms, the authorities intend to contain spending to limit the projected financing gap in 2020 to the impact of the COVID-19... To that effect, current spending excluding wages would fall by about 2 percent of GDP relative to 2019, supported by the reallocation of expenditures and a 30 percent cut in the operating budget of ministries and public institutions. This will not affect the budget contribution to vaccination programs, which will continue to be supported by the government.

Given the impending health crisis and the sizeable economic fallout, staff supports the relaxation of the fiscal stance... If the crisis and its economic fallout worsen further, additional relaxation could be envisaged given the availability of suitable financing.

our public financial management legislation, but also through the publication of budget execution figures contained in the treasury plan on a monthly basis to enhance financial transparency. Moreover, we commit to publish online all COVID-19 related procurement contracts that exceed US$12,000 and, for the contracts exceeding USD 1 million, to disclose the beneficial ownership information of contracted companies. We will also undertake a monthly internal audit as well as a specific audit of COVID19 related expenditures as part of the annual control of audit of the Audit Court, which should be published.

and the placement of T-bills, while spending is increasing owing to our response plan. Still, the government remains committed to the spirit and the implementation of the SMP...

The government will continue to implement reforms that could boost fiscal revenue mobilization, especially those linked to the VAT... when the situation normalizes. Of course, after the SMP, we are still committed to transition to an Extended Credit Facility (ECF).

Our authorities have responded swiftly with measures to contain the spread of the pandemic and dampen its impact on the economy. They remain committed to resuming their macroeconomic adjustment efforts once the crisis subsides.

DRC IMF ED Statement
...the authorities are taking preparatory steps to implement revenue-enhancing measures by
The authorities are committed to raising additional resources to close the residual fiscal gap. They noted that the proposed relaxation of the fiscal stance will still imply a sizable (across the board) adjustment in discretionary spending, a practice adopted in previous crises... The authorities intend also to request transfers from unused revenue of extra budgetary funds to the central government’s budget and to review the composition of expenditures to reallocate resources to priority sectors.

**DRC IMF ED Statement**
The authorities’ main policy action is the relaxation of the 2020 fiscal stance to accommodate the impact of the COVID-19. The fiscal cost of the pandemic amounts to 1.2 percent of GDP and includes revenue losses, budget-financed outlays in the national response plan and shortfalls in treasury bills issuance.

the end of the year, should the pandemic recede. This include digitalization of tax procedures, VAT collection, and enhanced controls at the borders.
Domestic adjustment efforts were also made to prioritize COVID-19 related spending. In this regard, the government cut current spending excluding wages by about 2 percent of GDP. As well, the operating budget of ministries and public institutions was reduced drastically by 30 percent. Spending in key programs like free basic education was preserved alongside expenditures in health care.

Staff supports the authorities’ decision to accommodate the fiscal costs | **Letter of Intent** We are committed to preparing a revised budgetary framework by end April so as to amend the 2020 budget and we are setting up specific procedures to track in a transparent manner crisis-mitigation exceptional expenditures, including to ensure that the support reaches the most vulnerable | **Staff Report** The authorities should return to the pre-crisis deficit from 2021 onwards once the crisis abates to preserve the gains achieved during the ECF/EFF-supported program and ensure debt sustainability... The authorities had delivered significant fiscal consolidation |

associated with the projected growth slowdown and health and economic emergency plans...

With the support of the World Health Organization (WHO), the authorities adopted an emergency health plan aiming at providing free care for infected people and equipping intensive care units, strengthening epidemiological and biological surveillance (virus testing; creation of a free call center; rehabilitating and equipping laboratories) and reinforcing capacities of pharmaceutical industries. Finally, they announced an ambitious economic support plan to prop the income of the most vulnerable segments of the population through agricultural input support and expanded cash transfers, provide relief to hard-hit sectors and firms...

The authorities intend to allow the fiscal deficit to increase to accommodate the impact of the pandemic. The total cost of the pandemic is projected to amount to segments of the population...

**Cote d'Ivoire IMF ED Statement**

The authorities also pay a high regard to accountability and transparency in the management of the pandemic-related expenditures. In this vein, they are working on specific procedures to track these expenditures and make sure they are effectively targeted to the response to the COVID-19.

Under the ECF and EFF-supported program. The fiscal deficit declined from 3.3 percent of GDP in 2017 to 2.3 percent of GDP in 2019, with consolidation underpinned by spending compression, as tax policy reforms proved more difficult to implement...

Beyond the crisis period, the authorities remain committed to sustainable fiscal policies. From 2021 onwards, and as the effects of the crisis are assumed to recede both globally and domestically, growth to resume and the need for exceptional spending to subside, the authorities are committed to returning to the pre-crisis deficit path of 2.3 percent of GDP, so as to maintain the gains realized during the ECF/EFF-supported program and to preserve debt sustainability.

**Cote d'Ivoire IMF ED Statement**

Going forward, the authorities are also committed to returning to their WAEMU fiscal deficit target.
2 3/4 percent of GDP in 2020... the authorities’ public health response and their economic support package accounting for 1, 1/4 and 1 1/2 percent of GDP, respectively...

Staff supports the authorities’ decision to accommodate the temporary impact of the pandemic on the budget. Given the extraordinary nature of the pandemic and in order to timely address the impending health crisis and mitigate its severe economic impact, staff supports the relaxation of the fiscal stance, even if the fiscal deficit temporarily breaches the regional convergence criteria of 3 percent of GDP.

| Eswatini, Kingdom of | Rapid Financing Instrument (RFI) SDR 78.5 million (equiv. to $110.4 million, 100% of quota) (direct budget support) | N/A | Staff Report | The authorities’ immediate priority is to cope with the impact of the pandemic while preserving macroeconomic stability. They have increased health spending, and introduced measures to protect the most vulnerable members of society and support the private sector...

The authorities’ immediate

**Staff Report**
The authorities have committed to publish bi-monthly reports on emergency-response spending, procurement contracts, and to undertake and publish the result of an independent audit of crisis-mitigation spending and procurement processes.

**Staff Report**
Going forward, despite the ambitious fiscal adjustment plans to preserve debt sustainability, financing needs remain large and the authorities need to develop a financing strategy that can support their gradual adjustment path or stand ready for a more front-loaded adjustment to cope when the pandemic fades out.
response to contain the social and economic impact of the crisis has been multi-pronged. To reduce the spread of the virus, the authorities have implemented a partial lockdown across the country and authorized additional health spending to improve the capacity of the health care system. To contain the impact on vulnerable households, they ramped up food assistance programs, increased social protection transfers, and accelerated the delivery of water and sanitation facilities to the most vulnerable with a cost of about 1 1/2 percent of GDP.

They have also implemented policies to mitigate the effects on firms’ cash flow, through temporary tax payment deferrals.

Moreover, the authorities have taken fiscal, monetary, and financial measures to contain the economic impact of the pandemic and support jobs and businesses.

Fiscal measures:

To enhance transparency and accountability of all COVID-19-related spending, they are using specific budget lines for such spending, and will publish on the website of the National Disaster Management Agency (NDMA) bi-monthly reports on spending execution. They will also publish procurement contracts for pandemic-related spending, including amount, awarded legal persons and beneficial owners, and ex-post validation of delivery. In addition, they will undertake and publish the result of independent ex-post audits of such spending and procurement processes...

Letter of Intent

... we have developed a detailed medium-term fiscal consolidation plan to stabilize public debt and bolster external buffers, while protecting the most vulnerable. Cabinet has approved a plan to adopt consolidation measures of 6 1/2 percent of GDP over the next three years starting in FY21/22, which are part of the government’s Medium-Term Recovery Strategy.

The current economic recession and the expected slow recovery will require us to implement the adjustment gradually, backloading some measures... about 40 percent of our adjustment plan relies on boosting our domestic revenue by broadening tax bases, increasing some tax rates such as personal taxation and VAT, and continuing strengthening tax administration. To protect revenue collection, we also commit not to introduce measures...
| **Additional spending of E100 million (0.14 percent of GDP) in FY19/20 to improve crisis preparedness.** |
| **In FY20/21, additional E1 billion (11/2 percent of GDP) spending on drugs, health equipment and other health spending, and improved access to food, water, and sanitation to vulnerable households.** |
| **Increases in electricity and water tariffs have been postponed.** |
| **Tax relief to businesses...** |
| **About E90 million (0.13 percent of GDP) in tax refunds have been budgeted for SMEs that are tax compliant, retain employees, and continue to pay them during the pandemic...** |

Given Eswatini’s limited fiscal space, it is important to identify possible spending, including low-priority public investment projects, to be curtailed in case the need for additional crisis-mitigating spending in health and programs to support that would reduce corporate income tax revenue...

**Eswatini IMF ED Statement**

The consolidation plan, recently approved by cabinet, aims to restore debt sustainability, while protecting the most vulnerable through a combination of spending and revenue measures. The plan will be implemented in the context of the future annual budget cycles and is centered around four pillars: reducing public wage spending, through gradual employment reduction and below inflation salary adjustments; rationalizing transfers and expenditure of state-owned entities; reducing operational expenditures and improving the targeting of the main social assistance programs; and, increasing domestic revenue through rate increases of some major taxes and base broadening measures, while suspending plans to introduce reforms that would reduce corporate income revenue...

SDR 300.7 million (equiv. to $411 million, 100% of quota)  
(direct budget support) | **High overall risk of debt distress** | **Staff report**  
The authorities are loosening the fiscal stance temporarily to combat the pandemic and support the most vulnerable. The initial response included a health sector support package—including to fund medical supplies, facilities, and to cut trade taxes for medical goods—amounting to 5 billion birr (US$154 million; 0.15 percent of GDP) in spending. The package is expected to be funded by reallocating budgetary funds away from uncommitted investment projects. On April 3, the authorities announced that additional spending needs during the remainder of the fiscal year would total $1.64 billion (1.6 percent of GDP)...

*Initial healthcare measures.* The authorities announced a 300-million-birr package to bolster healthcare spending (funding for health facilities, trade tax cuts for medical imports) in early March. On March 23, the package was augmented to 5 billion birr (US$154 million) to combat the pandemic and support the most vulnerable. | **Letter of intent**  
We commit to a transparent and accountable delivery of policy measures to respond to COVID-19 health and economic challenges and to effectively mitigate corruption concerns. Targeted measures will include: (i) publishing all public contracts related to the COVID-19 response, using open and competitive bidding and strictly limiting the use of emergency non-competitive processes to the extent possible; (ii) publishing online eligibility criteria and budgeted limits for the various relief measures as soon as they are adopted; (iii) channeling donor funding through the budget with full transparency on its utilization; (iv) frequent monitoring of spending on crisis mitigation measures at the end of each month for the duration of the crisis; and... |
| **CCRT Grant**  
SDR 8.56 million (equiv. to $12 million) | **Approved on April 30, 2020** | **Approved on April 30, 2020** | **Fiscal consolidation is expected to resume in 2021/22.** The authorities remain committed to introducing measures to raise tax revenues for 2020/21 by 1 percentage point of GDP. In the event that the pandemic renders this difficult, staff would support delaying implementation until the crisis abates and then introducing them in a supplementary budget law. |

**Letter of intent**  
The policies we are undertaking to address the crisis will make it necessary to delay our ambitious multi-year fiscal consolidation plan for the general government... We would like to highlight, however, that we see the spending increases as strictly temporary and remain committed to the multi-year fiscal adjustment plan under the ECF-EFF arrangements. |
Spending measures for the remainder of 2019/20. On April 3, the authorities announced that the multisector emergency response plan to be implemented over the next three months will require US$1.64 billion in funding (about 1.6 percent of GDP). The funds are expected to be allocated as follows:

- US$635 million (0.6 percent of GDP) for emergency food distribution to 15 million individuals vulnerable to food insecurity and not currently covered by the rural and urban PSNPs.
- US$430 million (0.4 percent of GDP) for health sector response under a worst-case scenario of community spread with over 100,000 Covid-19 cases of infection in the country, primarily in urban areas.
- US$282 million (0.3 percent of GDP) for provision of emergency shelter and non-food items.

(v) making information on how emergency relief funds are spent available to internal auditors and, as soon as practicable, to independent auditors to conduct ex-post audits over COVID-19 related spending and revenue collection.
| Country    | Rapid Financing Instrument (RFI) | N/A | **Letter of Intent**

Gambia IMF ED Statement
... the gross fiscal needs related to COVID-19 emergency are estimated at about 2.8 percent of GDP. This reflects a domestic revenue shortfall of about 1.0 percent of GDP during the next three months and 1.8 percent of GDP reflecting additional spending on health (under the Ministry of Health action plan prepared in collaboration with WHO and UNDP), logistics, security, and social interventions, including distribution of basic foodstuffs to the needy. An added challenge is that the existing programs (such as, school feeding) rely on institutions that are currently closed.

**Letter of Intent**

We also anticipate additional fiscal needs of about 2.5 percent of GDP reflecting:

(i) an expected domestic revenue shortfall of about 1 percent of GDP during the next three months;

(ii) emergency health expenditures of at least 0.5 percent of GDP as per authorities can use two options provided in The Gambia Public Finance Act to accommodate new spending priorities during a fiscal year on a provisional basis. These are:

(i) budget reallocation; and

(ii) creation of an emergency fund (capped at 1 percent of current budget) as a dedicated spending line within the treasury single account.

The authorities have, so far, been re-allocating spending from the existing 2020 budget to accommodate the COVID-19 spending.

Once the situation normalizes and the size of the COVID-19 spending can be fully assessed, the authorities will need to prepare a supplementary budget to maintain budget transparency and ensure that all the 2020 priorities are appropriated and executed in

They remain committed to pursuing sound policies articulated under the ECF arrangement, to strengthen macroeconomic stability and fiscal sustainability, strengthen governance and accountability and attain inclusive growth supported by private sector development. In addition, they intend to gradually unwind temporary measures, once the pandemic recedes and economic activity normalizes...
the action plan by the Ministry of Health; and

(iii) other emergency spending (on logistics, security, and social protection) estimated currently at another 1.0 percent of GDP...

The Government has taken several measures to contain the COVID-19 outbreak and to address its economic impact. These include:

Fiscal measures:

(i) a US$9 million COVID-19 action plan, for which we are seeking grant financing given the country’s debt situation;

(ii) reallocation of 500 million dalasi (0.6 percent of GDP) from the current budget to the Ministry of Health and other relevant public entities to complement the support already received from partners to prevent and control the spread of the COVID-19 outbreak...

These measures have allowed us to narrow the immediate financing 2020 to the extent of the financing available. This will prevent creating spending pressures in the 2021 budget. The authorities are also working to ensure transparency in crisis-related procurement and contracting to mitigate the risk of corruption in public expenditure.
needs to just over US$20 million (about 1.0 percent of GDP), for which we intend to use the requested RCF disbursement, primarily to meet the government demand for emergency imports of essential medical equipment, sanitary supplies, and basic foodstuffs to support our containment efforts and mitigate the impact of disruption in economic activity and income (including remittances) on the poor.

The authorities have set up an inter-ministerial National Emergency Response Committee in February 2020 to lead the country’s response to COVID-19. The Committee has successfully undertaken a wide range of measures to prevent the spread of COVID-19 and protect the population’s health...

The economic impact, however, has been large, and the authorities have taken significant steps to mitigate the impact of the shock on businesses and vulnerable households prone to poverty. Parliament was set to pass in late-April a supplementary budget for 2019/20 that reflects additional COVID-19 related expenditure in health and other areas of about 0.4 percent of GDP in 2019/20 and tax relief of a similar magnitude. The authorities are also reprogramming previously planned health expenditure to support their COVID-19 response.

Nevertheless, staff estimates that an additional 0.6 percent of GDP in ensure that such assistance is used for the very urgent purpose of resolving the current crisis.

To that end - - the authorities should undertake independent audits of samples of crisis mitigation spending and publish the results of these audits. - They should publish documentation on related procurement contracts on the government’s website, together with ex-post validation of delivery along with the name of awarded companies and the name of their beneficial owners. - Once the crisis abates, the authorities should introduce legislation to improve their capacity to detect illicit enrichment and to address conflicts of interest in line with international best practices and Fund advice; and improve fiscal transparency by expanding the quality and coverage of accommodate COVID-19-related measures is appropriate. These measures should be temporary and well-targeted. Once the crisis abates, it is critical that the authorities resume their pursuit of a growth-friendly medium-term fiscal adjustment, including raising revenues as a share of GDP, to reduce debt vulnerabilities.

**Staff report (reiterated in the Letter of intent)**

Staff supports the authorities’ plan to pause fiscal adjustment in the near term to accommodate COVID-related fiscal measures. Staff recommends that tax relief measures in response to the shock be made temporary and reversed once the crisis has passed...

A mission took place during February 19–March 3, 2020 to conduct combined Article IV discussions and discussions for a new precautionary Fund-support arrangement. Good progress was made towards such an arrangement and the authorities
spending could be required above what has allocated so far, including to protect livelihoods of those whose incomes have suffered from the economic disruption.

The CBK transferred financial gains of KES 7.4 billion from the recent currency exchange to the Treasury to support the budget.

The new supplementary budget reflects accommodation of additional expenditure relative to the previous budget and fiscal measures to protect vulnerable groups:
- COVID-19 spending interventions of KES 40 billion (0.4 percent of GDP) in 2019/20. Includes KES 5 billion in the health sector, as well as reallocation of previously planned expenditure, most of which will be covered by a USD 60 million support package from the World Bank that also covers 2020/21; KES 13 billion to expedite clearance of unpaid bills with suppliers; KES 10 billion to fast-track VAT refunds; and KES 10 billion for cash transfers to government finance statistics and commencing quarterly reporting on government fiscal outturns and annual reporting for the consolidated non-financial public sector, including public corporations.

Staff continue to view such a program as critical...

For 2021/22 and beyond, the authorities envisage further fiscal adjustment based on improvements in public procurement and public expenditure management that would allow for reductions in spending as a share of GDP without adversely affecting the quality of public services or achievement of their Big 4 Agenda for universal health care, agriculture, housing, and manufacturing. Staff recommend that revenue measures also be part of the medium-term fiscal consolidation strategy, with the aim of restoring and then raising the revenue-to-GDP ratio above that prevailing before the COVID crisis.

Staff supports the authorities’ plan to pause fiscal adjustment in order to mount a strong response to the COVID-19 crisis; but urges that tax relief measures be made...

**Staff Report**

The health and economic crisis stemming from COVID will worsen the fiscal deficit and create pressure on the BOP. Domestic revenues are expected to fall by 7 1/4 percent of GDP compared to the pre-COVID scenario, while additional expenditures on healthcare and mitigation measures in response to the economic consequences of the staff report.

**Staff Report**

The authorities have begun setting out plan for post-pandemic adjustment, and announced their intention to seek Fund support in this regard. Staff and the authorities agree on the need to reduce the wage-to-GDP ratio over the medium term...

Careful prioritization of
| million, 33.3% of quota) | The authorities have prepared a plan to respond to the health and economic consequences of the pandemic. An initial M700 million (about 2 percent of GDP) was allocated for the National Emergency Budget for COVID-19, to finance additional health care personnel, purchase of critical goods and services... In addition, the authorities are in the process of implementing a package of economic relief and social protection measures including the following:

- Expanding social protection:
  Existing cash transfers, such as the Child Grant Program will be topped-up. Public assistance will be expanded for 3 months, at a cost of M900 million, to add vulnerable groups such as children, elderly disabled, and those working in the informal sector. The authorities are providing a three-month stipend to industrial workers

| virus are expected to exceed 5 percent of GDP... | expenditures.

- Internal audits will be conducted of the spending on a quarterly basis, with ex-post audit by the Auditor General which will be submitted to the Ministry of Finance and the Public Accounts Committee of Parliament.

- To ensure enhanced transparency and accountability of COVID-19 related spending, the government will also publish COVID-related procurement documentation (including tenders, bids, and names of awarded companies and their beneficial ownership) on their website.

| expenditures could deliver a growth-friendly consolidation while still protecting the vulnerable. In this regard, the medium-term measures set out in the LOI [Letter of Intent] are a good foundation, and close engagement with the IMF through a Fund-supported program could help to further specify and implement the adjustment...

| ensuring sustainability in the post-COVID world will require strong efforts to control recurrent expenditure, particularly on the wage bill. **Letter of Intent**

We are wishing to reiterate our interest in exploring and pursuing a medium-term program with the IMF after the immediate crisis is resolved, with the intention to anchor the necessary adjustments and ensure sustainability.
furloughed as a result of the COVID crisis.

• Supporting food production: M100 million in subsidies to support production and increase uptake of M100 million in matching grants

• Supporting businesses: The authorities intend to clear M800 millions of arrears to MSMEs... They are expanding credit guarantee facilities by M450 million, while shifting risk exposure towards the government and loosening collateral requirements. They are also offering grants and rent subsidies to MSMEs and rent holidays to firms renting from the Lesotho National Development Corporation and local and municipal governments.

• Tax relief measures: The Lesotho Revenue Agency will defer CIT for the first two quarters for all businesses and provide tax deferrals for the Pay as You Earn (PAYE), VAT, and
Simplified Business Taxes for non-essential service providers.

The key priority is to meet all urgent health-related spending. Secondly, the authorities should ensure that fiscal policy cushions the most vulnerable from the effects the COVID-19 shock. A revised budget would be the preferred way to ensure these priorities are met, and staff encourage the authorities to pursue this option as the situation allows.

High risk of overall debt distress

Press Release
The authorities remain committed to protecting the most vulnerable amidst a significant revenue shortfall. The initial response to the pandemic, including the emergency food aid program, is welcome, but more remains to be done.

http://datatopics.worldbank.org/debt/ids/DSSI-LBR.htm

Staff Report
The impact will hit the poorest as there is little or no social safety net and the food security of those relying on uncertain daily income is a pressing concern. The full scale of the COVID spread is unknown, but the health care system is underdeveloped and likely to be overwhelmed should cases rise.

The authorities’ policies to address the pandemic include direct measures (quarantine requirements and a nation-wide lockdown announced on March 22; and fiscal measures, including securing a US$3 million emergency response budget. More policy responses are however needed, requiring close cooperation between the authorities and

Staff Report
The authorities are determined that timely monitoring and control of spending improves, including to ensure that crisis spending reaches the intended population...

However, a central weakness remains—in that some institutions are not required to spend through the Integrated Financial Management and Information System (IFMIS). The Public Finance Management Act (PFMA) requires autonomous agencies and special funds receiving advance funding from the central government to report their monthly spending to the Ministry of Finance each month.

The Ministry of Finance’s guidance is that they should report their spending in the IFMIS before the next funding is disbursed. However, some non-compliant institutions

Letter of Intent
Looking ahead to FY2021, increasing revenue shortfalls and the need for some additional COVID-19-related spending will likely produce a cumulative fiscal gap of about 3 1/2 percent of GDP across both fiscal years...

On the fiscal side, in FY2021 we expect a combination of IMF disbursements, generous additional budget support from our major donors, and moderate cuts to wages, subsidies and capital spending to largely compensate for lost revenue, allowing health and social safety net spending in our FY2021 budget to approximate the level anticipated under our ECF-supported program...

We remain committed to the goals and policies contained in our ECF-supported program, and look forward to completing the first review once the COVID-19 situation eases. Our focus over the few months will need to be on
development partners, including: procuring and distributing medical supplies; ensuring households have access to food throughout the lockdown; and funding and executing the budget—including paying wages to health workers even in the face of anticipated revenue shortfalls.

The Liberian authorities are enhancing their response including by: putting all available domestic resources into the government consolidated account; reallocating non-essential spending to emergency food aid; improving monitoring and control of spending; and safeguarding scarce foreign exchange reserves.

The authorities are hoping to finalize a COVID-19 preparedness plan in conjunction with the donor community together with its financing. External support to Liberia in response to COVID-19 is likely to be firmed up once the comprehensive plan has been finalized. Areas of concentration continue to receive advances, especially if deemed to provide important social services.

The authorities have therefore imposed the requirement, beginning July 1, 2020, that all budgetary spending entities utilize the IFMIS for all their expenditure. Combined with the advances in expenditure monitoring and control made to date and further advances in cash management, this should be sufficient to ensure that all government revenue, commitment spending and cash spending is reconciled with government bank statements and monitorable on a weekly basis.

The Ministry of Finance will begin publishing weekly spending reports including non-compliant institutions’ unreconciled spending amount on its website effective immediately. This measure should help ensure that crisis-short-term macroeconomic and fiscal stability and crisis response.

However, looking ahead, in consultation with IMF staff, we have already clearly identified the actions necessary to bring our ECF-supported program back on track. We want to return quickly to the growth and macroeconomic trajectory outlined in our ECF-supported program, as we continue to regard this framework as both appropriate and necessary for the underpinning of our medium-term development plan, the Pro-Poor Agenda for Prosperity and Development, and will continue to seek donor assistance in support of this plan.

The authorities reiterate their commitment to reforms under the ECF arrangement to stabilize macroeconomic conditions and lay the foundation for inclusive and durable growth. Once the crisis subsides, they will resume fiscal consolidation to support debt.
under the plan include support to health care workers, purchase and rehabilitation of health care equipment, procurement of drugs and other medical supplies, and deployment of surge staff to contact tracing activities, border areas, rapid response teams, training of responders, planning, communications and information sharing, staffing and equipping of laboratories, and logistical and supply support...

The COVID-19 Household Food Support Program (COHFSP) was conceived in early April. The COHFSP, initially started as a support to the poor during a planned total lockdown, has since evolved into a nation-wide feeding program to provide social protection to those living in poverty and to further food security. To make this program inclusive, a Steering Committee (SC) was formed on April 18, composed of political party leaders, civil society, religious leaders, cabinet members, as well as development partners, to

mitigation funds are used for their intended purpose.

The authorities have committed to the General Audit Commission conducting a post-crisis audit of crisis spending within a year of the date of approval of the RCF disbursement. This action will not only ensure that the crisis spending is not wasted, but will also provide lessons that will be needed to further strengthen existing systems—not only to effectively respond to crisis situations, but to improve public sector spending more broadly in the post-crisis period.

For transparency, the authorities will publish the results of the audit within two weeks of its finalization. They will also publish on the government’s website all procurement contracts paid from the budget in the remainder of FY2020 and all of sustainability, including domestic revenue mobilization and rationalization of expenditures.
oversee the program. The SC weighed need against available resources and decided that the program will cover a total of 2.5 million people, cover all 15 counties, and feed the targeted population for 30 days...

FY2021 above a value of US$200,000 for goods, above US$400,000 for public works, and above $100,000 for services along with the names of the companies awarded the contract, their beneficial owners, and validation of delivery of the goods and services specified in the contracts.

**Staff Report**

They [the authorities] remain committed to promote stronger, more inclusive, and sustained growth, and reiterated their interest in beginning discussions on a successor ECF as soon as the current crisis has stabilized...

Beyond the immediate response to the current shock, the authorities are committed to continue reforms, as outlined in the recent Article IV/6th ECF.
activation of the national contingency plan to fight the pandemic and with the support of development partners. For example, on March 12, 2020 the World Bank, provided a grant of $3.7 million to strengthen prevention against the Covid-19 pandemic, purchase materials and equipment, and train health workers. This grant is expected to be increased up to $13.9 million in coming days. The Government also announced that it will cover individual health expenses related to the pandemic.

- Strengthening social protection by supporting the most vulnerable, to contain the epidemic while mitigating its negative financial consequences. First measures include government donations (notably rice, sugar, dry peas, soap, and oil) to the most vulnerable, notably the homeless and the elderly, as well as some workers in the

**Review Staff Report**, including: On fiscal policy, the main objective remains creating fiscal space to finance investment and raise social spending based on a sustained and well-sequenced strategy covering both revenue administration and tax policies...

The authorities must focus on immediate measures to mitigate short-term economic and financial impacts and to preserve macroeconomic stability. While discussions on a new multi-year successor arrangement are planned, they cannot be concluded immediately...

Beyond this much-needed immediate financial assistance, the authorities have reaffirmed their willingness to remain engaged with the IMF, to benefit from its policy advice and its technical assistance. They have also reiterated their interest in initiating discussions for a successor arrangement that would support their economic reform.
informal sector particularly affected (such as taxi and other public transport drivers and street vendors). In addition, workers temporarily out of work can postpone repayment of their mortgage or consumer credit for the next three months.

- Supporting the private sector to safeguard the financial viability of companies and limit the impact of the crisis caused by this external shock, especially on employment. After meetings with the private sector (including the banking sector), the government announced a number of tax measures, including some deadline extensions for certain declarations and payments, and some tax exemptions on social and health spending related to the Covid-19 pandemic. In addition, in case of temporary impediments to work ("chomage technique"), employees can benefit from a government allowance while...

To ensure enhanced transparency and accountability of COVID-19 related spending, the PPDA will also publish the names of the beneficial owners of the awarded companies and conduct and publish a thorough ex-post validation of delivery; and the Ministry of Finance will publish quarterly statements on commitments and payments of COVID-19 related activities, specify COVID-19 related costs in the published monthly salary report and in their budget funding and cash management analysis. |

Press release
Once the crisis abates, it will be important to safeguard medium-term debt sustainability by boosting domestic revenue mobilization and enhancing public financial management.

Staff report
Discussions on the 4th review under the Extended Credit Facility (ECF) arrangement will be continued when there is greater clarity on the outlook—necessary for developing or modifying future performance criteria and setting timelines for structural reforms under the arrangement—which is clouded by the evolving nature of the pandemic.
sudden exogenous shock from the COVID-19 pandemic—budget support is not being proposed at this time given sufficient domestic liquidity to finance the larger deficits and that a substantial portion of health care and social assistance programs are off-budget programs financed and operated by development partners.

budget), are also in the process of increasing their outlays.

- Increase social assistance spending under the social cash transfer program (SCTP) to help the most vulnerable households mitigate the economic impact of the virus. Government spending on SCTP covers only one district and less than 10 percent of total SCTP spending; development partners directly finance and administer the rest of the SCTP program (on-budget). In response to COVID19, during FY 2019/20, under the foreign financed portion of the SCTP, the number of beneficiaries—especially in urban areas—has been expanded through universal transfers to all residents of vulnerable urban neighborhoods (identified from census data). In FY 2020/21, the transfers provided to each recipient of the SCTP will be permanently raised by 40 percent (for both the government and foreign-financed portions).

The National Audit Office will submit quarterly audits of COVID-19 related spending to the Minister of Finance (for submission to Cabinet) and, once the pandemic abates, will publish and submit to Parliament a comprehensive audit of COVID-19-related spending by the government and ADMARC (Agricultural Development and Marketing Corporation).

... the authorities are committed to advancing their medium-term economic reform program, supported by the ECF arrangement, which seeks to entrench macroeconomic stability and enhance poverty-reducing and resilient growth.

Key measures include:
- To strengthen medium-term public debt sustainability and ensure sufficient fiscal space for critical resilience building and social and development spending, a domestic revenue mobilization strategy will be implemented as soon as the pandemic passes— including comprehensive VAT reforms—as well as continued improvements in spending efficiency...

Performance under the Extended Credit Facility (ECF) arrangement has been broadly satisfactory...
• Purchase and storage of maize by the Agricultural Development and Market Corporation (ADMARC, a state-owned enterprise), financed by borrowing from banks and 0.1 percent of GDP from the budget for each of FY 2019/20 and FY 2020/21. This measure is intended to mitigate the impact of partial market closures on farmers’ incomes and ensure food security for the second half of the year—especially for the most vulnerable.

• Granted tax waivers on imports of medical equipment, medicine and other supplies directly needed to counter the pandemic.

• To free resources to fight the pandemic, temporarily reduced salaries of high-ranking government officials and will delay spending on goods and services and development projects (in non-health areas)—including through review of on-going and planned projects—that are not essential to tackling the immediate crisis.
Staff Report
Emergency budget spending to contain the outbreak and mitigate its economic and social impact is estimated at 2.2 percent of GDP for 2020, accompanied by accelerated payments to the private sector. Announced measures focus on strengthening medical care capacity and income support for the most affected households and firms.

To support the healthcare response, the government is strengthening testing capacities, expanding quarantine and hospitalization facilities, and improving medical care capacities through a planned support to the health sector (including bonuses to health workers).

Social measures in support of poorest households. These measures include the setup of a special fund to provide targeted income support to the poorest households, a mass distribution of grains and food for livestock to poorest households, the supply of electricity and water free.

Staff Report (reiterated in Letter of Intent)
... the authorities recognize the importance of safeguarding donors’ financial assistance towards this crisis to ensure it is used for its intended purpose and, toward that end, have committed to undertaking and publishing an independent and robust third-party audit of this spending in about a year’s time; report quarterly on the spending of the emergency funds; and publish regularly on its website documentation on large public procurement projects, together with ex-post validation of delivery along with the name of awarded companies and the name of their beneficial owner(s).

Letter of Intent
We will incorporate all COVID-related spending into a supplementary 2020 budget in due time and will continue publishing information on revenue and expenditure.

Staff Report
The authorities have been implementing a reform program supported by the IMF’s Extended Credit Facility (ECF). The main objective of the program is to support strong and inclusive growth, create fiscal space to safeguard social and infrastructure spending in the face of mounting security expenditures, and support reforms to improve governance. The first review under the ECF arrangement was completed on January 8, 2020. Discussions under the second review—to assess the end-2019 fiscal outcomes and recalibrate the program going forward—are infeasible in light of the existing pandemic-related restrictions, the magnitude of the shock, and the uncertainty around the macroeconomic outlook, and will resume when circumstances allow...

The authorities are committed to returning to the ECF program fiscal objectives when the
of charge to the poorest consumers for the months of April and May 2020 (which will increase subsidies to state-owned suppliers), a 3-month exemption from VAT on electricity and water tariffs, and a 3-month exemption from customs duties on the import of basic food...

Support to firms hit by the economic slowdown from the preventive containment measures. These measures include an SMEs-support guarantee fund of 0.2 percent of GDP; support to the public electricity and water utilities; clearing budget arrears accumulated during this year; and granting tax deferral and relief to ease liquidity constraints on the hardest-hit companies, especially in the hospitality sector (hotels, restaurants, transportation). In addition, the government urged commercial banks to restructure ailing firms’ debt, building on the framework set up by the regional central bank (BCEAO) to support firms with repayment difficulties...

performance...

The Government has created a special fund to receive contributions from the private sector and citizens, which will be executed in line with budgetary and accounting procedures provided for this purpose under the law.

In line with our commitment to strengthening institutions and promoting good governance, we are keen to ensure that the best possible use will be made of the funds provided by the developmental partners, the international finance institutions, the private sector and Malian citizens and, to that effect, we will enhance mechanisms of reporting and controls for the disbursement of funds.

pandemic’s effects have abated. They are confident that the extra resources from international donors will preserve the economic fabric of the country and allow for a quick recovery, a significant reduction of the fiscal deficit in 2021 and a steady increase of the tax-to-GDP ratio...

Letter of Intent

We greatly appreciated the fiscal space exceptionally allowed under the first review of the Fund-supported Extended Credit Facility (ECF) program to safeguard the space for such priority spending...

The government will continue to be guided by the ongoing reform agenda agreed under the Fund-supported ECF and look forward to having further discussions with the IMF staff on how best to safeguard the objectives of the program in light of Mali’s current situation. In particular, we remain committed to taking any further measures that may prove necessary to this end and will
Staff encourages the authorities to ensure that the measures taken are temporary and aimed at addressing the crisis, in order to safeguard the integrity of the tax base and the medium-term stability of the public finances.

**Letter of Intent**

The COVID-19 pandemic has hit the economy at a time when the country is facing an unprecedented security crisis. The spiral of terrorist attacks and intercommunal clashes have given rise to significant loss of life and to a jump in the insecurity-afflicted populations in need of humanitarian assistance. In response, the government has been forced to allocate steadily increasing budget resources to military and security spending (including for the ongoing recruitment of 12,500 additional soldiers) at the expense, unfortunately, of social and development spending...

Rapid Credit Facility (RCF) SDR 83.66 million (equiv. to $114.49 million, 63.6% of quota, 0.9% of GDP)
| **Approved on April 13, 2020** | **Rephasing of access under the existing ECF arrangement – SDR 118.44 million, 90% of quota (to allow more time for completion of the next review while maximizing financial support under the RCF)** | **ables/DSSI-NER.htm** | **597 billion (7.6 percent of GDP) and require large grants from the international community to be affordable...**

Regarding the government’s first plank of the response plan, health policy is immediately focused on prevention and containment, to be followed by a more general strengthening of health care capabilities. In the face of limited health care resources, the focus remains on containing the spread of the virus, through restrictions on domestic movements, suspension of international travel except for trade, awareness campaigns, and case tracing. Additional costs relate to the purchase of test kits, protective and other equipment, and the setup of isolation centers. Training would be largely covered through technical assistance by development partners. Niger also plans to hire 1,500 additional health workers, bringing total staff to some 10,500. Broader upgrades to the health care system remain contingent on funding availability. | **measures at the Ministry of Finance, recognizes the importance of ensuring that financial assistance received is used for its intended purposes...**

Additional revenues of between 1 and 2 percent of GDP thanks to the start of crude-oil exports in 2022 should facilitate further consolidation and compensate for the 2020 deficit overrun. Staff encourages the authorities to reach understanding with the WAEMU authorities on a temporary deviation from the fiscal deficit convergence criterion... The authorities’ medium-term macroeconomic policies will remain guided by the objectives of the ECF-supported program. Maintaining macroeconomic stability is the core goal, with prudent fiscal policy making the final consolidation push in 2021 and 2022, underpinned by reforms to mobilize domestic revenues and improve spending quality... Fiscal consolidation once the COVID-19 pandemic will have passed, underpinned by revenue mobilization and spending quality... |
Regarding the second plank, the government is keenly aware of the social hardship the crisis is inflicting. It arises from the pronounced downturn in certain sectors, such as the hospitality, transport, and construction sectors, but above all from the restrictions on movement for the self-employed and informal workers that can no longer fully pursue their trade. Staff welcomed plans to distribute food at reduced prices or for free from the strategic food reserve and plans to waive utility payments for poor households for two months. It suggested that the government also look into expanding cash-transfer programs and providing financial incentives for the opening of mobile money accounts, while targeting all measures as well as practicably possible to those in need...

Public spending is bound to rise due to additional health care spending, as well as economic and social mitigation measures. The authorities have called for an improvements, should preserve public debt sustainability and macroeconomic stability.
increase of health and health-related spending by up to 2 percent of GDP and economic and social mitigation measures will further add to outlays, to the extent that they are not in the form of tax relief. However, the authorities plan to limit the rise of domestically-financed public expenditure to 0.3 percent of GDP compared to what was envisaged in the last ECF review by re-prioritizing existing budget allocations and as donors reshuffle project aid and the international community provides in-kind support, notably for stocking the strategic food reserve.

Staff Report (reiterated in Nigeria IMF ED Statement)

Nigeria IMF ED Statement
While reviewing the 2020 budget, the government intends to reduce non-essential capital spending by response activities, including names of awarded companies and beneficial owners.

Anti-corruption and governance efforts should continue to be strengthened, including by strengthening the role of the Federal Audit Board, increasing resources available to anti-corruption agencies, strengthening the asset declaration framework, implementing the risk-based approach to AML/CFT supervision and ensuring the transparency of beneficial ownership of legal persons. To ensure financial assistance received as part of the COVID-19 response is used for intended purposes, staff supports the authorities’ commitments to: (i) undertake an independent audit of crisis-mitigation spending and related procurement processes once the crisis abates and publish the results; and

The authorities (in their letter of intent) have indicated that they are committed to ensuring debt remains sustainable by pursuing revenue-based fiscal consolidation. In this regard, they emphasize that their Economic Recovery and Growth Plan (ERGP) will include additional transformative measures that will help them achieve their 15 percent of GDP revenue objective within five years. Such steps—both through tax policy and administration reforms—would help ensure the interest payments to revenue ratio remain sustainable, even at the federal government level...

Staff supports the authorities’ immediate actions to respond to the crisis and their commitment to medium-term macroeconomic stability once the COVID-19 crisis passes. The short-term focus on fiscal accommodation and the removal of fuel subsidies are welcome... Once the crisis passes, it is important that these reforms be sustained and that revenue-
about 1 percent of GDP to accommodate increased healthcare spending.

(ii) publish procurement plans and notices for all emergency-response activities, including names of awarded companies and beneficial owners.

The authorities reiterated their commitment to governance reform. They noted they are planning to take all the necessary steps to ensure that crisis funding is used for its intended purpose. In particular, they assured that adequate resources will be provided to relevant governance institutions, including the Auditor General of the Federation—which will spearhead an independent audit of COVID-19 emergency response expenditures. They were confident that the audit can be completed expeditiously as this is a special accounting exercise for only a few budget lines, which will be created specifically for these spending and will be posted based fiscal consolidation resumes.

**Nigeria IMF ED Statement**

Our authorities remain committed to safeguarding macroeconomic stability and foster economic growth in line with the Economic Recovery and Growth Plan (ERGP). In this regard, fiscal policy will be driven by the government’s planned medium-term fiscal consolidation path, which entails increasing revenue to 15 percent of GDP through further VAT reforms, increasing excise taxes, and removing tax exemptions once the crisis abates. The authorities are committed to resume revenue-based fiscal consolidation to eliminate central bank financing and create space for priority spending.

The authorities intend to allow the fiscal deficit to increase to accommodate the impact of the Pandemic. Based on preliminary information, staff and the authorities project the total cost of the Pandemic to amount to 3.4 percent of GDP over the next two years, including both revenue losses and increases in public spending—1.9 and 1.5 percent of GDP, respectively. Public spending is expected to be equally allocated between measures to mitigate the health and economic impact of the Pandemic...

The authorities are working on a plan to support affected households and firms. Public health and social spending initiatives will be further prioritized in the current and FY 20/21 budget. Financial support in the form of subsidized loans and debt restructuring to the hospitality and other hard-hit sectors, small and medium enterprises (SMEs), and individuals are currently under consideration.

limit of 5.5% of GDP on average over a rolling 5-year window from FY19-20 under the PCI).

Staff will work with the authorities to identify a timeline for the appropriate fiscal adjustment path and on how to refine the program fiscal rule through the introduction of an escape clause to address specific shocks in the context of the forthcoming PCI review.

**Letter of intent**

Significant uncertainty about the economic outlook due to the evolving nature of the Pandemic makes completing the second review of the PCI arrangement difficult at this time. Even as we contemplate an increase in public spending to carry out emergency response, we are aware of the need to ensure that this would not jeopardize macroeconomic stability and ensure that public debt-to-GDP ratios remain sustainable.
Staff supports the authorities’ decision to accommodate the impact of the Pandemic on the budget. Given the extraordinary nature of the Pandemic and in order to timely address the impending health crisis and mitigate its severe economic impact, staff supports the relaxation of the fiscal stance and the temporary suspension of the program fiscal rule. If the crisis and its economic fallout worsen further, additional relaxation could be envisaged provided the availability of financing.

Authorities’ initial commitments to prioritize health initiatives and support vulnerable sectors and firms are encouraging. Staff plans to continue discussions with the authorities on how to support affected households and firms to ensure that they are well-targeted, cost-effective, and do not crowd-out other priority areas, as well as to advise them on the preparation of a contingency plan if the situation deteriorates further...

Once the crisis subsides, we will stand ready to undertake fiscal consolidation over the medium-term to achieve the PCI objectives. The fiscal cost associated with the Pandemic and torrential rains has also prompted a discussion in the government on the need for an escape clause in our fiscal rule to allow for emergency spending associated with such catastrophic events, which we plan to discuss with IMF staff in the context of the next PCI review.
**Letter of Intent**

On the spending side, the uncertainties about the duration and potential spread of the Pandemic are complicating a full assessment of the impact and its cost to the budget. Currently, the estimated total cost of our emergency response plan, including COVID-19 health-related spending, is estimated at RWF150 billion over two years (or 0.8 percent of GDP in FY2019/20 and 0.6 percent of GDP in FY 2020/21).

| Rwanda (2 of 2) | Approved on June 11, 2020 | Rapid Credit Facility (RCF) | SDR 80.1 million (equiv. to $111.06 million, 50% of quota) (budget support) | Moderate overall risk of debt distress | **Staff Report** | COVID-19 has had a severe economic impact on Rwanda through the implementation of strict domestic measures to contain the spread of the virus and related global spillovers. The authorities have responded by deploying health and economic measures totaling USD 311 million (3.3 percent of GDP). They have also set up an economic recovery fund to support firms affected by the pandemic… | **Staff Report** | The authorities are committed to transparency as required by the Organic Budget Law and to report all COVID-19-related expenditures. Proper monitoring of expenditures will be ensured through the creation of the financing item “COVID-19 response” under the chart of accounts. A separate bank account under the treasury single account system has also been created to receive all contributions related to the pandemic. Information | **Staff Report** | The authorities’ decision to further relax the fiscal stance is warranted given the deteriorated economic outlook and their successful efforts in mobilizing concessional financing…The identification of a credible adjustment path to bring public debt to prudent levels should start without delay. To be credible, this path should be designed now and implemented soon after the crisis abates. It should include measures to step up revenue mobilization efforts and to better prioritize |
... the authorities have taken steps to support households affected by the pandemic, including by rolling out a food distribution program, cash transfers to casual workers, subsidized access to agricultural inputs, and measures to ensure poor households’ access to basic health and education.

Such measures are articulated as part of a broad government strategy in the recently announced Economic Recovery Plan (ERP). The ERP includes allocating public resources through the Economic Recovery Fund (ERF) to support firms in the sectors hardest hit by the pandemic by providing subsidized loans to eligible businesses through banks and microfinance institutions (MFIs)...

Credit guarantees will also be extended to SMEs and micro businesses in the informal sector to help them sustain operations and safeguard jobs... The total cost of the government response in the plan stands at about USD 311

on all awarded government contracts—including the name of competing companies, each initial bid, the company name and price of the winning bid, and the total contract amount—is publicly available from the government’s e-Procurement system.

Moreover, pandemic-related expenditures, along with other government spending, will be audited by the Office of the Auditor General whose independence is granted by the constitution and the outcome made publicly available...

public investment, also critical for contingency planning...

They (the authorities) are also committed to a growth-friendly fiscal consolidation as soon as the COVID-19 crisis abates to keep debt sustainable, and to assess and mitigate emerging fiscal risks. To this end, they plan to formulate and discuss the desirable polices in the context of the next PCI review.
| million or 3.3 percent of GDP over the current fiscal year and the next... |
| ... the government’s response plan – the national Social Protection Response and Recovery Plan (SP-RRP) – aims at providing emergency relief and supporting the economic recovery, while ensuring access to basic services for populations affected by COVID-19. |
| (a) Emergency relief response. The authorities have been providing door-to-door food distribution to vulnerable households whose activities have been halted by lockdown restrictions. They have also increased the coverage and amount of support under existing schemes. Additional eligible households are identified based on existing social protection databases, civil registers, and grassroot organizations at the village level. |
| (b) Support for economic recovery. Eligible households will benefit from casual employment opportunities in labor-intensive projects (e.g. road |
rehabilitation programs), subsidized access to agricultural inputs (e.g. fertilizers and seeds), pro-poor credit schemes for investing in income-generating activities, and basic equipment to start new businesses with a view to restoring livelihoods disrupted by the pandemic.

(c) Access to basic services. Measures to ensure poor households’ access to basic health and education amid COVID-19 include a reduction of contributions to the community-based health system, subsidized tuition fees and school material for children, and the construction of shelters and sanitation facilities.

The total cost of scaling up existing social safety net programs under the SP-RRP is estimated at RWF 133.6 billion (1.4 percent of GDP) over the next 18 months. The government aims at raising the share of beneficiary households from 26 percent in March 2020 to 70 percent by December 2020, with the
proportion of the poorest households covered by the VUP income support programs increasing from 64 to 90 percent...

Announced fiscal measures have been timely and well-articulated but warrant further clarifications. Initial measures to support the health sector and vulnerable households have been timely. The Economic Recovery Plan (ERP) provides a comprehensive and articulated set of fiscal measures to address the health and economic crisis. The plan could clarify some aspects of the targeting and adequacy of the proposed social protection programs, and of the economic impact and efficiency of the proposed infrastructure spending. The authorities should ensure the ERF is well-targeted, and its risks appropriately assessed, managed, and reported. Tax relief measures need to be temporary, costed, and closely monitored.

  (SDR 107.9 million, 33% of quota)  
  (budget support)  

- A strategic plan to fight against COVID-19 is being implemented to:  
  i) enhance testing and treatment capacity,  
  ii) strengthen preventive measures, and  
  iii) intensify communication. Its implementation is costed at about FCFA 70 billion (0.5 percent of GDP)...  
  
- The authorities’ preliminary fiscal plans to confront the COVID-19 pandemic are costed at about 1.7 percent of GDP. This is the sum of the direct measures to support the health sector (0.5 percent of GDP), tax measures (0.15 percent of GDP), and spending measures (1.05 percent of GDP)...  
  
- The authorities intend to allow the fiscal deficit to increase to accommodate the impact of the pandemic while reprioritizing spending. The authorities are prioritizing expenditures to the
health sector and the most vulnerable households and sectors...

The authorities have announced a package of measures to support the most vulnerable segments of the population and the most affected sectors. A first set of measures to combat the direct effects of COVID-19, notably linked to the needs of the health sector and estimated at CFAF 73 billion (0.5 percent of GDP) was announced mid-March...

Beyond health, the authorities’ priorities are first to enhance resilience and social cohesion by implementing fiscal measures targeting the most vulnerable and affected households and firms, with in particular an amount of CFAF 69 billion allocated to provide urgent food aid, and, second, to ensure availability and distribution of essential goods and medical supplies, while maintaining macroeconomic stability...

On the expenditure side, expenditure reallocation and savings
on fuel subsidies will allow to support particularly hard-hit sectors of the economy and households, including through food aid and cash transfers to vulnerable households, and expediting payments of unmet obligations. On cash transfers, the authorities plan to leverage the existing “bourses familiales” program by first extending support beyond the current 300,000 beneficiary households to the full 580,000 households registered as vulnerable, and, with World Bank support, to further extend this support to a total of 1 million households including those newly affected by the pandemic. The government will set up a national solidarity fund (fonds de riposte et de solidarité—Fonds FORCE COVID-19) of up to FCFA 1,000 billion (7 percent of GDP), financed by a mix of donor contributions, voluntary donations from the private sector, and the budget. The Fund will be used to support vulnerable households and firms.
The national solidarity fund would additionally be used to support the most affected sectors of the economy in a transparent manner by taking over some operating costs of companies in difficult situation such as social security fees, or utility bills, with the aim of preserving jobs...

**Senegal IMF ED Statement**
The authorities have prepared a health response plan against the Covid-19 pandemic whose first phase enabled the establishment of an operational emergency system financed exclusively from domestic resources up to CFA 6.4 billion.

The second phase estimated at CFA 64.7 billion aims to strengthen Senegal's capacities to deal with the pandemic through the detection of suspicious and confirmed cases, the rapid isolation of patients, and the strengthening of prevention and control of the infection in health facilities and in the community.

The Supplementary Budget Review appropriates health and COVID-19 mitigation spending, pushing up the FY2020/21 fiscal deficit. The supplementary budget amended the FY2020/21 budget to:

(i) reprioritize resources away primarily from non-essential acquisition of goods and services and delay investment projects (about R100 billion); and

(ii) provide temporary tax relief and funds to limit the impact of the recession on the most vulnerable, ensure functioning of basic services, and support the private sector’s financial viability (about R155 billion). About 30 percent of the

| **Staff Report** (reiterated in the Letter of Intent) ... the authorities will transparently plan, use, monitor, and report all COVID-19-related spending to ensure it reaches the targeted objectives, notably by:

Regularly publishing the execution of COVID-19-related expenditures vis-à-vis the adjustment budget by type of spending.

Auditing all COVID-19-related expenditure, including ex-post evaluation of delivery, within 12 months and publishing the audit report on the Auditor General’s website.

Publicly disseminating all COVID-19-related procurement contracts and allocation (with details about awarded companies and their beneficial owners)...

| **Press Release** The RFI will... complement the authorities’ strong policy response to the crisis and their planned post-COVID-19 fiscal consolidation and reforms to promote growth that benefits all South Africans.

**Staff Report** (reiterated in South Africa IMF ED Statement) Once the health crisis subsides, the authorities intend to address long-standing fiscal and structural issues to drive the recovery, boost potential growth, reverse the rising trend in public debt, and foster greater inclusion...

Staff recommended a gradual and growth-friendly but sizable reduction of the consolidated government deficit. This consolidation will require implementation of fiscal measures of about 5–5 1⁄2 percent of GDP over the next five years, which alongside the impact of the growth recovery would allow the deficit to decline to average levels of about 4 1⁄2 percent of GDP in
announced package (3.2 percent points of GDP) will add to the deficit...

In line with their supplementary budget, the authorities described their fiscal priorities as follows:

The wage bill has been rising at a faster pace than the cost of living due to automatic increases unrelated to productivity. Given the health emergency and benign inflation, the authorities plan to implement their policy (announced in the FY2020/21 budget) to rationalize compensation by renegotiating the final year of the current wage agreement with unions. Savings in the wage bill of about 0.7 percent of GDP facilitate the needed increase in transfers to low-income households. If the decision is overturned by the court, implementation risks would increase, as additional savings would be needed.

Compensation to the unemployed and provision of social grants will be the medium term. Needed measures include limiting increases in recurrent expenditure, mainly compensation, transfers to SOEs, and ill-targeted subsidies, while pursuing a recovery of productive public investment and protecting outlays for health and education and well-targeted social assistance.

The authorities intend to pursue policies to that end. They will let the temporary relief package lapse as the pandemic subsides; make permanent some of the COVID-19 related cuts in non-essential outlays and take any additional measures to restore fiscal and debt sustainability in line with their reform scenario...

Should the pandemic produce further economic damage or other risks to the outlook materialize, post-COVID-19 fiscal consolidation would need to be larger and reforms deeper, given the absence of fiscal space and the high debt...
carried out transparently. The authorities are committed to efficiently target the temporary expansion of grants to unemployed youths in addition to existent recipients—mostly children and old adults—using the country’s well-established national ID and means testing system. The authorities will ensure grants are received by legitimate beneficiaries maintaining continued transparency and accountability.

**Letter of Intent**
We decided to implement a strong relief package amounting to R500 billion or more than 10 percent of GDP in response to the crisis. It is part of a set of interventions divided into three phases. In the first phase, we have reprioritized disaster relief already allocated in the budget towards the health sector; phase two relates to the fiscal support package; while the third phase will take place over the medium term and will be directed toward structural reforms to achieve higher level. The authorities are confident that the planned expenditure streamlining will be complemented by enhanced tax revenue from the economic recovery aided by better tax administration (including leveraging anti-money laundering tools to investigate tax crimes) and other measures.
and more durable economic growth. Given the profound uncertainty around the evolution of the pandemic and health-related conditions, it is likely that these phases will overlap.

As part of the relief package, we are implementing measures that include support to vulnerable groups through six-month top-ups of social security grants, food security, and other forms of distress relief; temporary employment relief support through the unemployment insurance fund; additions to health services; funding for municipal services such as cleaning, sanitizing and provision of clean water to poor and rural communities; school sanitization and preparedness; support to small businesses and workers and to critical public entities; and tax deferral measures and payment holidays. We have also launched a credit guarantee scheme for small and medium-sized firms. The scheme will be implemented in phases, over a minimum of 2 years.
(SARB) will provide the initial funding, but the fiscus will ultimately backstop and guarantee credits for an initial amount of R100 billion, up to a limit of R200 billion.

The direct impact of the fiscal package on the consolidated budget amounts to R185 billion while R101 billion of existing expenditure commitments will be reprioritized and shifted towards COVID-19-related interventions. The rest of the spending will be financed through the use of cash balances and borrowing from multilateral institutions (around US$7–7.5 billion).

**Staff Report**
The authorities have developed an action plan against COVID-19 and are seeking support from development partners. The authorities’ plan comprises three main pillars: prevention, detection, and treatment. Prevention includes controls at airport/port/borders, communication, training, and social distancing. Detection consists of tests and identification of potential cases. Treatment covers confinement, dedicated hospitals, mobile clinics, and special equipment.

The immediate and direct costs of this plan is estimated at CFAF 21 billion (about $35 million or 0.6 percent of GDP). Beyond this near-term plan, the authorities also intend to improve key health infrastructure to strengthen resilience against pandemics and chronic diseases.

**Letter of Intent**
We remain committed to continue reducing public debt level and bolster permanent revenues while stepping up health spending to address the effects of the ongoing COVID-19 pandemic. Furthermore, we will continue to focus our policies on sustainable and inclusive growth, including the protection of social spending.
The overall financing need is estimated at about CFAF 70 billion (about $130 million or 2 percent of GDP). The authorities are in discussions with development partners to cover some items under this plan and has currently secured financing of about CFAF 7 billion; they also plan to partly cover the costs of this plan with own resources...

Measures to improve the execution of social protection programs are advancing, which will also help protect the vulnerable population against the implications of COVID-19. The recent overhaul in the management of a key social program is expected to accelerate its implementation. The deployment of a monitoring system for social expenditure is being accelerated and the data processing capacity strengthened. A coordination process was initiated among various stakeholders (i.e. ministry of finance, line ministries, development partners). A manager is being appointed at the ministry of...

despite the fiscal consolidation...

We remain committed to decisively advance the structural reform agenda... we will pursue measures to improve further revenue collection, modernize core customs procedures, and reduce vulnerabilities to corruption. We will continue to broaden the tax base, encourage voluntary compliance, and improve taxpayer services...

**Debt Sustainability Analysis**
The authorities broadly agreed with staff's assessment of Togo's public debt situation and recommendations. They concurred with staff's assessment of risk ratings and distress level. Given that Togo’s overall risk of debt distress remains high, they recognize that the fiscal consolidation must continue in order to bring public debt down below the relevant benchmark.
### Uganda

**Approved on May 6, 2020**

**Rapid Credit Facility (RCF)**
- SDR 361 million ($491.5 million, 100% of quota)

  - The authorities plan to devote 70 percent of the Fund’s support to support the central bank’s reserve position, with [https://datatopics.worldbank.org/debt/ids/DSSI_MTables/M-DSSI-UGA.htm](https://datatopics.worldbank.org/debt/ids/DSSI_MTables/M-DSSI-UGA.htm)

  - Low risk of debt distress

**Staff report**

- The authorities should strengthen the existing social protection tools to protect the most vulnerable during the crisis and continue increasing health spending over the medium term. The authorities have agreed to revisit and postpone some of the planned lower-priority expenditure if they do not mobilize sufficient financing...

**Letter of Intent**

- We also agree to monitor this expenditure and identify it in budget monitoring reports. We commit to disclose all public sector financial commitments (debt), respecting commercially sensitive information, within 3 months, and not later than September 1, and are willing to request technical assistance from the IFIs to achieve this...

**Staff report**

- Staff encourage the authorities to continue to step up social protection programs, which can cushion the impact on the vulnerable population both during the current emergency and the recovery phase, and to continue protecting health allocations over the medium term...

**Letter of intent**
As a first immediate emergency response, the authorities are prioritizing health spending to fight the pandemic... The Ministry of Health, working jointly with key development partners, has prepared a plan to respond to COVID, with an initial cost of about US$125 million over the next six months. The plan includes measures such as the urgent recruitment of additional health personnel, the upgrading of equipment, and the mobilization of medical supplies and key health commodities such as test kits, personal protective equipment, oxygen, ventilators and ICU beds.

To finance the plan, the authorities have already used US$1.3 million from their Contingency Fund in the FY2019/20 budget and passed a supplementary budget. Furthermore, since funds are being reallocated from other health programs to the COVID response, essential health services are also under strain and require financing.

To foster transparency of accounting and management of resources, we will provide a separate reporting mechanism for COVID-19 expenditures in the context of our Program Based Budgeting that will allow for clear tracking of the support received by partners. UDB will also report on the use of the funds received. We are also committed to continuing to adhere to the best fiscal management practices and to ensuring that the best possible use is made of the funds provided by the IMF, and we commit to anti-corruption safeguards.

To that effect, we commit to (i) publishing, once they are signed, documentation on the government’s website of large procurement contracts—defined as contracts above Ush500 million for works contracts, and above Ush200 million for goods and services—

Our policy intentions for the medium-term remain guided by the need to maintain this stability, underpinned by fiscal sustainability and inclusive economic growth. In particular, we are working to adjust our FY2020/21 budget by September 2020, since the version just endorsed by Parliament does not include the impact of the COVID-related crisis. We are however mindful that projections show a large residual financing gap in the expected revised budget for FY2020/21. If we fail in mobilizing sufficient external financing, we commit to readjust expenditures and consider additional revenue measures. We are also committed to ensure that the health sector continues to receive adequate financing going forward.
The authorities are taking measures to mitigate the impact of the pandemic on the economy and to support the most vulnerable groups. **Key measures include**

(i) shielding the most vulnerable affected by the lockdown and containment measures via a food distribution campaign; and

(ii) introducing an economic stimulus package to support the severely affected private sector.

The details of the package are still under discussion, but there is already agreement that key measures will include expedited repayment of domestic government arrears to private sector suppliers; boosting the lending capacity of the state-owned Uganda Development Bank (UDB) to provide affordable credit to support private sector companies to reorient their production towards COVID response related items; the deferment of tax payment obligations for the most affected sectors; the introduction of tax exemptions for items used for medical use; the support with water of COVID-19 expenditures, together with the names of awarded companies and their beneficial owners and

(ii) undertaking an independent audit of COVID-19 expenditures in about a year’s time, which will include an ex-post validation of delivery of the large procurement contracts, and publishing the results.
and electricity utilities; and the expansion of labor-intensive public works programs...

COVID-related expenditure is expected to be 1.7 percent of GDP for the calendar year 2020, of which 0.6 percent of GDP in FY2019/20 and 1.1 percent in FY2020/21...

Staff also emphasized the usefulness of social protection packages to cushion the impact of the shock on the most vulnerable; Uganda could strengthen some of the existing social protection mechanisms, considering a temporary expansion to reach vulnerable people in need, as the interventions under consideration so far could be insufficient....

There was agreement that budget allocations for health need to continue to be increased and sustained over the medium term—the pandemic has shown in the hard way how important it is to ensure that the health sector gets sufficient allocations.
Letter of intent
We need significant budget resources to address critical spending, including health spending and increased social assistance to the most vulnerable, to help contain, manage, and handle the pandemic while mitigating its negative financial consequences. As a result, we have immediate fiscal needs for the remainder of FY2019/20 estimated at US$565.5 million or 1.5 percent of GDP, and at close to US$1.5 billion for FY2020/21.

To support such vulnerable population... we are working closely with the Ministry of Gender, Labor and Social Development and our development partners to strengthen existing social protection mechanisms and, provide one-off targeted cash transfers and cash for work aimed at shortening the window of economic vulnerability swung wide open by the pandemic. Work is on-going to define the key parameters and operational
modalities to roll out this mitigation mechanism across the most vulnerable groups.

spending therefore would conservatively amount to 3.5 percent of GDP in 2020, of which nearly half is expected to be funded by donors...

The authorities’ immediate priorities are appropriately focused on mitigating the social and economic fallout of the pandemic. A temporary fiscal loosening and substantial donor support are needed to fund critical health and social mitigation spending and accommodate a revenue shortfall. Limiting the widening of the fiscal deficit to 3.5 percent of GDP by taking one-off revenue measures and cutting non-essential outlays will also help contain the deterioration of the balance of payments...

**Letter of Intent**

We cautiously estimate that COVID-related outlays to cover the cost of health, containment, and basic mitigation will amount to Af 30.8 billion (2 percent of GDP), of which we expect to spend about Af 9.6 billion.

Supreme Audit Office will undertake audits of selected spending and publish reports by end-December. The authorities indicated that close involvement and oversight of donors provides additional comfort about the quality of spending.

The authorities have reiterated their request for a new IMF arrangement to support their economic reforms. They informed staff that should the pandemic’s shock prove worse than expected, they will seek additional resources from development partners and also from the Fund in the context of a prospective program or through a request for another RCF disbursement...

Beyond the immediate response, the authorities remain committed to safeguarding macroeconomic stability, advancing governance and structural reforms, and promoting inclusive growth.

**Letter of intent**

Should the fiscal cost of the pandemic be larger than anticipated currently, we will seek more financing from donors and cut low-priority spending. We will also ensure that current extraordinary measures will not...
billion on social mitigation. We have already allocated Af 1.9 billion for emergency health spending, which is funding key actions underway, such as (i) establishing testing labs; and (ii) setting up dedicated hospital wards; and (iii) procuring the critical medical supplies. But more is needed. Initial estimates by the WHO put the required number of beds at 23,400; masks at almost seven million just for healthcare workers; and 52,000 healthcare professionals. To meet those needs, over the course of 2020, health expenditure will grow by some 0.6 percent of GDP or 57 percent relative to the budget.

With the support of the World Bank, other development partners, and humanitarian agencies, we are developing a social relief package to be provided to the needy via the most effective means—including through cash transfers, initially to the most vulnerable households. The size of the package will be calibrated to assure food security. Where cash transfer is not practical, become permanent by reviewing them monthly and phasing them out as soon as possible.

We commit to bring our fiscal deficit to within 1 percent of GDP by 2022. As the pandemic wanes, with pandemic-related spending phasing out and tax revenues recovering, the fiscal position should improve. Over the medium term, we will keep the operating deficit excluding grants on a declining path to reduce aid dependence. To meet these fiscal objectives, we aim to mobilize domestic revenue and further optimize our spending, while preserving priority social outlays. We continue our preparatory work to introduce a value-added tax (VAT) in January 2021, but may have to reassess our plans, in consultation with IMF staff and other stakeholders, if the pandemic lasts longer than currently expected.
a basic foodstuffs package, comprising flour, cooking oil, rice, soap, and sugar, may be used instead. Depending on the coverage and its size, such a package delivered nationwide could cost about $300–400 million (1.5–2 percent of GDP).

We intend to meet pandemic-related spending needs while keeping the overall fiscal deficit under 3.5 percent of GDP in 2020. This will help contain our balance of payment gap at its estimated level. To this end, the DAB transferred Af 12.7 billion of its 2019 profits to the budget in line with the existing framework, and we are considering further one-time revenue measures. We have also identified savings of about 1.3 percent of GDP in security-related and non-priority spending. Our mid-year budget revision will fully reflect the updated revenue projections, priority health and social outlays, and the required expenditure revisions.

</tbody>
</table>
Support measures are estimated to involve above-the-line costs (subsidies and interest) of almost 1 percent of GDP. Taken together, these factors will result in a widening of the deficit to around 5 percent of GDP...

Letter of Intent
Our immediate policy focus is on measures to contain the spread of the COVID-19 virus and ensure that our health system is ready to meet the coming needs of the Armenia people. Our economic response is framed around a set of measures estimated at about AMD150 billion, which will provide targeted and temporary assistance to businesses and our vulnerable population in order to prevent this shock doing more permanent and generalized economic damage.

Impact.
When contemplating post-crisis support, the authorities should consider the pros and cons of various alternatives. For measures that include direct investment in companies, they should enact sufficient transparency and safeguards to limit risks to the public sector balance sheet, and the potential for distorting competition or creating opening for corruption.

Memorandum of Economic and Financial Policies (Attachment to the Letter of Intent)
We will arrange for an ex-post audit of the on-lending business support schemes in the COVID-19 package and publish the results of the audit. The audit will be conducted by a top 10 internationally known independent audit company.

Property taxation. We are in the final stage of deciding the taxation parameters across different types...
of property... We remain committed to start tax collections under this new regime in 2021, with a transition period allowing for a gradual increase in the taxation burden through 2024.

**Armenia IMF ED Statement**
Looking ahead, the authorities remain committed to preserving medium-term debt sustainability while protecting investment and social spending. They are strongly determined to bring the government debt down to below 50 percent of GDP through gradual fiscal consolidation, in line with the fiscal rule, once the crisis dissipates. This assumes mobilizing additional tax revenue and containing current expenditures over the medium-term, while creating space for additional capital spending.

three installments of due corporate taxes for 2019 only for affected sectors, temporary real estate tax relief for industrial and tourism sectors; higher subsidy pay-outs for exporters; a 6-month grace period for MSMEs for insurance premia; an extension to a moratorium on agricultural land tax for 2 years; a reduction in the stamp duty on capital market transactions; and postponement of the capital gains tax for residents for 17 months while abolishing it for nonresidents...

We are committed to safeguarding fiscal and debt sustainability, while providing maximum needed support for the health sector and affected sectors as well as protecting the vulnerable. Accordingly, our crisis-related measures to contain its economic impact are designed to be timely, targeted, transparent, and temporary. If additional spending is needed to address the crisis, the Government is prepared to reallocate resources from less urgent spending items to crisis
| **Egypt (2 of 2)** | Approved June 26, 2020 | Stand-By Arrangement (SBA) SDR 3.76 billion (equiv. to $5.2 billion, 184.8% of quota) (budget support) | N/A | **Staff Report** The SBA will aim to maintain macroeconomic stability amid the crisis while continuing to advance structural reforms to strengthen prospects for higher medium-term growth and job creation. Policies to achieve these objectives include:  
- Easing fiscal policy in FY2019/20 and FY2020/21 to support crisis spending on health and targeted support for the most impacted sectors and people, and resuming the downward trajectory of public debt from FY2021/22...  
To confront the health and economic crisis, fiscal policy will provide much-needed support to the most-affected individuals and sectors. Expansion of social support | **Letter of Intent** In the interest of transparency and accountability, we will continue to track and report all crisis-related spending, including through our various fiscal documents published throughout the budget cycle in line with international best practices. We intend to publish all crisis-related spending in a consolidated manner on the Ministry of Finance web site and will publish government procurement plans and awarded contracts for the emergency responses to COVID-19, including the names of the awarded companies and information on beneficial ownership in accordance with... | **Staff Report** The authorities’ policies, supported by the SBA, will aim to maintain macroeconomic stability while pursuing targeted structural reforms to improve debt management and private sector-led growth. An important challenge is trying to design the right policies in a highly uncertain environment. Thus, the SBA seeks to strike a balance between providing the crucial short-term stimulus to minimize the human and economic toll of the pandemic while avoiding buildup of imbalances in the medium term. Recalibrating policies and priorities to continue to strike this balance may be necessary as the crisis evolves... |
for the vulnerable has been scaled up—the targeted conditional cash transfer program Takaful and Karama will now reach around 31/2 million families. Since the outbreak of the pandemic, resources have also been directed towards the provision of food as well as medical and sanitation supplies to remote villages and other vulnerable groups...

A supplementary budget could be needed in December to reflect updated fiscal projections as the impact of the crisis becomes clearer. If needed, the authorities are also prepared to delay low priority current and capital spending in favor of essential spending (particularly on health and targeted social protection...)

On the expenditure side, allocations for health spending are projected to be higher by 26 percent in FY2020/21, the highest annual growth for any ministry or sector and almost triple the annual growth in total expenditure. Allocations

the applicable law.

As is customary, the Accountability State Authority will audit crisis-mitigating inflows and spending including ex-post validation of delivery and publish the results of such COVID-19 spending review after the end of the fiscal year.

On the revenue side... Parliament passed a broadly revenue-neutral reform of the Personal Income Tax to increase progressivity, in line with IMF technical assistance recommendations. To ensure a minimum level of tax revenues to help meet the spending pressures, the authorities are committed to meeting a floor on tax revenue (proposed indicative target). In this regard, the authorities have prepared additional revenue measures such as the proposed one-percent tax on salaries of public and private employees across all sectors and 0.5 percent on pension payments over 12 months which could raise around EGP10 billion (around 0.18 percent of GDP) to support the health sector as well as firms and workers hit by the crisis...

The envisaged fiscal envelope for FY2020/21 would temporarily raise government debt to about 93 percent of GDP (from 84 percent of GDP in FY2018/19). Under current assumptions, the
| Projected for social protection have increased by nearly 10 percent. Given the criticality of these two spending categories in the current crisis, a minimum spending floor for these categories is proposed as an indicative target...

Improving the social safety net remains an important priority. The authorities are looking into expanding social support to include more vulnerable groups including at-risk women, the elderly, and school children (feeding program). They are committed to a public expenditure review, supported by the World Bank, that covers social protection, health, and education programs. The immediate focus of the review will be on evaluating the effectiveness of social spending, identifying gaps, and providing recommendations by April 2021...

The authorities’ economic program supported by the proposed SBA offers a credible plan for maintaining macroeconomic stability amid the uncertainty. The authorities aim to unwind the temporary crisis-related expenditures and return to fiscal consolidation to resume the downward path of public debt in FY2021/22...

The authorities are committed to continuing structural reforms that already began under the EFF...

Revenue mobilization will support higher primary surpluses to create room for priority spending on health, education, and social protection... The Medium Term Revenue Strategy (MTRS) is currently being revised to reflect the post-COVID-19 outlook in revenue and expenditure, with a view to receiving Cabinet approval by end-December 2020 (proposed structural benchmark)...

| 128 |
policies appropriately aim to prioritize higher health and social spending, reduce risks to debt sustainability, rebuild FX reserves, further strengthen the monetary policy framework, and maintain financial stability. These policies are complemented by focused structural reforms to continue past efforts to support private sector development. The reform program provides flexibility to respond to additional crisis-related spending needs that may arise, while also safeguarding fiscal and external balances.

Health sector support: About EGP 8 billion has been allocated to support healthcare, including providing medical supplies and disbursing bonuses for medical staff working in quarantine hospitals and labs. Pay increases were also authorized for medical professionals. Treatment costs for COVID-19 have been capped in private hospitals.

Fiscal Measures. Relief for vulnerable groups and irregular

be complemented by efforts to rationalize current expenditures while protecting critical social, health and education spending; contain losses and contingent liabilities in the energy and water sectors; and improve the targeting of Jordan’s social safety net.

Consult Fund staff in how the program could be adapted to ensure its objectives remain achievable while ensuring there is needed COVID-19-related spending. Given the uncertainty about the extent and duration of the crisis in Jordan and globally, it is not possible to quantify the economic effects and the specific policy response on the program at this stage. However, the program would be reassessed, as needed, at the time of the reviews...

Structural fiscal reforms are critical to underpin any fiscal strategy over the medium term...

On the expenditure side, efforts should be concentrated on: (i) containing the wage bill, particularly after the increased compensation agreed in 2019 and legislated in early 2020; (ii) making more efficient the provision of public health services; (iii) rationalizing transfers to public sector entities; (iv) streamlining social assistance programs and improving their targeting to
protect the vulnerable; and (v) further rationalizing non-priority current expenditures, as warranted.

Memorandum of Economic and Financial Policies
The authorities are committed to a gradual and steady fiscal consolidation that will help to bring down public debt during the program period, while allowing for social and capital spending to support inclusive growth. The budget for 2020—approved by Parliament in January—aims to reduce the primary fiscal deficit from 3.8 percent of GDP in 2019 to 2.3 percent of GDP. This reduction in deficit is based on the additional revenues from the new income tax law... Expenditure reductions focus on measures to compress non-priority current spending, and to reduce the public-sector wage bill through a buy-out civil service scheme. They also include measures to rationalize services and transfers, improve the targeting of social
The Jordanian authorities have responded with decisive containment and health measures that effectively limited the spread of the virus with minimal fatalities. They also implemented a timely package of policies to mitigate the economic fallout of the pandemic. The government provided targeted financial support to the most severely impacted businesses and individuals, who lost their jobs and income...

The authorities have also implemented a number of measures to cushion the economic fallout of the shock. They established a fund to cover emergency medical outlays, exempted medical supplies from sales tax, provided temporary cash-flow relief to companies by allowing delayed payments of sales taxes and customs duties within the year as well as electricity bills until June, temporarily reduced social security assistance, and strengthen the public procurement system.

As the crisis abates, the authorities are committed to resuming gradual fiscal consolidation and accelerate structural reforms to rebuild buffers and support growth, in line with the EFF [Extended Fund Facility] objectives.

On March 25, the Executive Board of the IMF approved a four-year arrangement under the Extended Fund Facility with access of SDR 926.37 million (270 percent of quota). The program was designed before the COVID-19 outbreak and its main objectives were strengthening macroeconomic stability and deepening structural reforms to address impediments to private sector development and thereby raise potential growth. While these objectives remain valid in the medium term, the immediate priorities have shifted to containing the health crisis and...
contributions from 21.75 to 5.25 percent and the maximum load tariff for electricity consumption of selected sectors, and introduced a cash transfer program to support the unemployed and self-employed (0.3 percent of GDP, while at the same time trying to find savings including in the wage bill, budgetary transfers, and non-essential investment months from the end of the fiscal year.

minimizing its economic fallout…

The authorities are also committed to return to the fiscal consolidation strategy agreed under the EFF arrangement as soon as the situation normalizes… the pace of fiscal consolidation may need to be reconsidered at the time of first EFF review, in view of developments in containing the pandemic both in Jordan and globally, and Jordan’s growth trajectory.

The authorities plan to resume the needed fiscal consolidation from 2021 by cutting lower priority spending, curtailing tax exemptions, reducing evasion, and strengthening tax and customs administration.

Letter of intent
While great uncertainty remains with respect to the duration and severity of the crisis, we view the fiscal consolidation as critical to placing debt on a downward path, mitigating rising risks to debt

| Rapid Credit Facility (RCF) | Moderate overall risk of debt distress | for health-care workers, the procurement of personal protective equipment, medical tests, and respirators, the buildup of quarantine facilities, and a communication plan about measures to contain the pandemic.

To ease the impact on the economy, they adopted an initial package of economic measures totaling $15 million (0.2 percent of GDP) including the postponement of tax payments, time-bound exemptions of property and land taxes, temporary price controls on 11 essential food items, and food distribution to the poorest segments of the population.

They are also preparing a second package of economic measures totaling around $400 million (5.2 percent of GDP), including cash transfers to the poorest segments of the population, subsidized credit lines to banks to provide funding to small and medium-size enterprises, and the rebuilding of food buffer stocks that have almost been efficiently spent on addressing the crisis.

To ensure the quality of emergency spending in the health and other sectors, the authorities will subject all procurement of urgently needed supplies to an ex-post audit by the Audit Chamber, of which the results will be published on the website of the Ministry of Finance.

In addition, they will publish bidding documents for competitive and single tender procurement, including those of state-owned enterprises and joint stock companies with state shares of more than 50 percent and their subsidiaries, on the Public Procurement portal.

They will take the necessary measures within the government’s prerogative to publish ex-post validation of delivery along with the name of half of the year... they plan to... develop a plan to bring the deficit below 3 percent of GDP once the crisis abates... |

Disbursement of SDR 36.8 million (equiv. to $51 million, 28.6% of quota)

Given the large fiscal financing needs, staff supports the request that the remaining ECF disbursements be made in the form of budget support.

To mitigate the sanitary, social, and economic impact, the authorities adopted in May a comprehensive national COVID-19 response plan covering 2020–21, prepared with support from international development partners and UN agencies. The plan envisages outlays of $644 million (8.5 percent of GDP) for health-related prevention and response measures, support for agricultural production, constitution of stocks of essential foodstuffs, direct support for vulnerable households and SMEs, and credit lines and guarantees for businesses. Due to capacity constraints and confinement measures, many of the plan’s measures remain unspecified or at an early stage of development and are not expected to be implemented fully this year.

In May, the authorities adopted a supplementary 2020 budget envisaging a primary deficit of 5 percent of NEGDP (excluding grants), accommodating about half finance minister and comprising representatives from parliament, the private sector, and civil society. The commission oversees the coordination, planning, and execution of the emergency response and is tasked with informing the public regularly on the status of COVID-19-related spending; it reports to an inter-ministerial committee chaired by the Prime Minister.

The authorities also reconfirmed that all resources (including the social assistance fund) were channeled through the budget and concurred with the need to publish procurement contracts and to audit crisis mitigation spending as soon as possible and to publish the results. They established dedicated budget lines to facilitate tracking of funds through the existing IT system to ensure that budgetary resources deployed for the emergency response...
The authorities discussed the need to bolster domestic revenues, strengthen the social security system, and enhance the response capacity in the face of lower oil prices and increased social spending (primarily medium-term social spending, as well as baseline education and health care) to avoid economic scarring effects on the youth and women.

The supplementary budget anticipated revenue losses of over 7% relative to the initial budget (including tax revenues lower by 21% and primary expenditure increases of 20%, even accounting for across-the-board cuts on nonpriority current spending). It only incorporated the pending and tax relief measures envisaged under the national COVID-19 response plan that were ready to be implemented (5.3% of NEGDP).

The resources devoted to the sanitary response (0.5% of GDP) are comparable to peer countries...

There was broad agreement that the ECF-supported program will help Mauritania cope with the short-term effects of the COVID-19 pandemic. Staff and the authorities discussed the immediate policy priorities, namely:

1. Focusing on essential containment measures and support for health systems; and
2. Shielding affected people and firms through crisis-mitigation measures and releasing the immediate policy support for the intermediate policy period.

The authorities also agreed to publish the full text of procurement contracts related to crisis mitigation on the Ministry of Finance's website, with details including the names of the awarded companies and their beneficial owners, the specific nature of the goods or services procured and their price per unit, and ex-post validation of delivery. They will consider expanding those transparency measures to all procurement next year.

Finally, the authoritiesrequest that the Court of accounts regularly audit crisis-mitigation spending and publish results online by September 2021.

Given the magnitude of the shock, accommodating a wider fiscal deficit is inevitable, provided it remains temporary and enough financing is mobilized. There was agreement on the need to continue executing counter-cyclical, well-designed public investment projects to support cyclical, well-designed public expenditure both in the short and the medium term. Furthermore, the authorities agreed to expand the credit lines and to publish regularly audit results and other planned structural reforms, consistent with the authorities’ implementation capacity. This will help during the subsequent stabilization and recovery phases of the crisis.
fiscal and financial sectors measures; and (iii) reducing stress to the financial system. Two new structural benchmarks (SBs) related to social protection and transparency of emergency spending are macro-critical and support an effective response to the pandemic...

There was agreement to proceed with the implementation of the urgent and priority elements of the COVID-19 response plan by allocating sufficient resources for critical healthcare, emergency services, and social protection as per the supplementary 2020 budget.

- The authorities are scaling up the targeted cash transfer scheme to the poor and vulnerable from 34,000 households in March to a target of 55,000 households by end-October (new structural benchmark, SB), 70,000 households by end-2020 and 100,000 by end-2021 (representing close to 700,000 avoided introducing new spending programs and widening the deficit beyond the revised program targets unless domestic resources and/or additional donor grants can be mobilized. The authorities will develop contingency plans to identify spending that can be cut without jeopardizing the effectiveness of core policies if the fiscal position deteriorates further than anticipated...

**Letter of Intent**
We remain committed to the overarching goal of the Strategy for Accelerated Growth and Shared Prosperity (SCAPP) covering 2016–30, which constitutes a flexible intervention framework allowing us to integrate the main challenges posed by the multifaceted crisis caused by the COVID-19 pandemic. Our economic policies aim to: (a) continue with fiscal consolidation and reinforcing debt sustainability at a gradual pace favorable to the recovery of growth; (b) mobilize public
people). This should be achieved by expanding both the social registry of vulnerable households and the cash transfer program to cover the whole territory, with support from the World Bank. A temporary scheme also provided emergency food aid and cash support to over 200,000 households in July on the basis of the social registry and other local lists of vulnerable households.

• To support affected economic sectors, including informal activities, the authorities are setting up, with donor support, a credit guarantee fund for businesses and SMEs by early 2021.

• Given limited fiscal space and high debt, the authorities have created room for emergency and social needs by cutting non-essential spending. In this regard, the supplementary revenue by expanding the tax base and modernizing tax administration procedures, and prioritize public investment; (c) modernize and strengthen monetary policy to better manage bank liquidity; (d) strengthen bank supervision and regulation and the financial infrastructure to ensure the stability of the financial system and expand credit to the private sector; (e) reform the foreign exchange market to introduce greater exchange rate flexibility; (f) increase the fiscal space for social spending, especially in education, health, and social protection to consolidate progress in poverty reduction...

...to anchor this year's fiscal expansion within a medium-term fiscal framework that preserves debt sustainability, we will prepare a plan to unwind the temporary measures and return to a primary budget surplus once the crisis abates.
2020 budget cut goods and services appropriations across the board by about 10 percent and plans for national food stockpiling have been postponed.

The authorities intend to request a new ECF arrangement once the current program expires at the end of 2020 to address remaining macro-structural challenges...

The authorities recognize the importance of embedding this year’s expansionary fiscal measures in a medium-term budgetary framework to preserve debt sustainability. In coordination with staff, they will put in place a plan to gradually withdraw temporary fiscal measures and revert to a primary fiscal surplus over the medium-term. These efforts will be better supported through the intended new ECF arrangement.

| Pakistan | Approved on April 16, 2020 | Rapid Financing Instrument (RFI) $1.386 billion (SDR1,015.5 million, 50% of quota) (budget support) | https://datatopics.worldbank.org/debt/ids/DSSI-MTables/M-DSSI-PAK.htm | Staff report | The Prime Minister announced a comprehensive fiscal package aiming to boost the health and disaster response capabilities and reduce the impact on low-income households that will be affected by the containment measures. | Staff report | To ensure the quality of emergency spending in the health sector, the authorities commit to subject the procurement of urgently needed medical supplies to an ex-post audit by the Auditor General of Pakistan, the results | Staff report | The authorities reiterated their commitment to resume the reforms included in the EFF [Extended Fund Facility] once the crisis abates. These reforms are crucial to boost Pakistan’s growth potential to deliver broad based benefits for all Pakistanis, |
The announced fiscal stimulus package, worth 1.2 percent of GDP, includes (i) relief to vulnerable families through an expansion of existing programs and higher disbursements (see below); (ii) support for daily wage earners by establishing a PRs 200 billion fund for the most affected workers; (iii) strengthening the utility stores corporation network and funding to increase food security; (iv) temporary reduction in food prices to ensure essential items remain affordable; (v) provision of affordable healthcare through the elimination of taxes on essential health machinery and equipment...

Staff stressed that the enacted measures should be targeted and temporary, focusing in particular on health spending and utilizing existing social support schemes to provide quick and targeted support to the most vulnerable, but not result in permanent distortions of the overall fiscal envelope. In that context, staff welcomed the scaling up of social assistance and the of which will be published on the website of the Ministry of Finance. This measure will help limit vulnerabilities to corruption.

especially the most vulnerable segments of the population. Reassuringly, the authorities have reaffirmed their commitment to the EFF and to implement the key policies in the program that will help support growth, build buffers, reduce public debt, and strengthen governance. In this regard, they underscored their commitment to maintain the fiscal consolidation strategy... embedded in the EFF.

Pakistan IMF ED Statement
In particular, the authorities are committed to gradually bringing the fiscal deficit down to lower levels once the exogenous shock created by COVID-19 crisis is overcome. A credible medium-term fiscal consolidation will put public debt on a firm downward trajectory.
Somalia
Approved on March 25, 2020

Extended Credit Facility (ECF) and Extended Fund Facility (EFF)
SDR 292.4 million ($395.5 million, 179% of quota)

The full amount of the EFF arrangement (SDR 38 million) will be available in the first purchase.

Access under the ECF arrangement will be evenly phased and is intended to be used for Central Bank of Somalia (CBS) reserves accumulation.

Launching under Ehsaas of the Emergency Cash Program to provide immediate financial support to over 10 million recipients identified with support of the provinces.

The authorities are committed to resuming fiscal consolidation once the crisis abates. These efforts will include a reduction of the civil service wage bill as a share of GDP and further energy subsidy reforms, taking into account the social implications.

- **Rapid Financing Instrument (RFI)**
  - SDR 545.2 million (equiv. to $745 million, 100% of quota) (budget support)

- **Staff report**
  - The public health system can respond to the crisis from a comparatively strong basis: public health care covers the entire population, including through the provision of free or subsidized care for low-income households; and spending on health initiatives increased in recent years as part of GDP starting in 2021. The authorities would also refrain from granting new tax incentives. The high tax rates would be rationalized only after a broadening of the tax base has been secured...

- **Letter of Intent**
  - The detailed policies underpinning the medium-term fiscal consolidation program will be included in the FY2021 and FY2022 budgets. We will engage early with Fund staff on the design of fiscal measures underpinning the consolidation in the budgets.

- **N/A**

  - The RFI provides a faster path to cover essential consumer staples (such as wheat, sugar, and cooking oil). These exemptions are temporary and will be phased out as the supply constraints ease. These VAT exemptions will help support the poor as the consumer staples are a large part of their consumption basket. We are also considering providing tax relief for small and medium-sized businesses in affected sectors (by delaying the 2020 tax filing deadline and ensuring that advance tax payments are based on the current economic situation and not the past economic outcomes). and publish the results on the external website of the Ministry of Finance. In addition, to ensure quality of this additional spending, we will subject the health spending, including procurement of urgently needed medical supplies, and social spending to ex-post audits by the Chamber of Accounts and ex-post validation of deliveries in a year’s time, which will also be published on the external website of the Ministry of Finance. The government will also improve the transparency of its procurement processes in line with international best practices.
urgent needs than the current Extended Fund Facility (EFF) arrangement. The current EFF arrangement for Tunisia was cancelled on March 18, 2020 upon the authorities’ request.

higher social spending supported under Tunisia’s 2016-20 EFF arrangement.

Additional spending of 0.3 percent of GDP to respond to the Covid19 virus will be used for the acquisition of emergency medical supplies and hospital equipment, including test kits, laboratory equipment, ICU beds, and ventilators. Increasing the strategic food reserve will consume 0.2 percent of GDP, while income support of 0.8 percent of GDP will assist Tunisians that are the most affected by the confinement enforced since March 22 and other social distancing measures (low-income households, the unemployed and the self-employed).

Finally, tax relief and credit lines as well as interest subsidies will benefit firms that will come under stress in the crisis, especially small-and medium-sized enterprises (0.5 percent of GDP).

**Staff report**

The authorities reiterated their strong intention to request a successor EFF arrangement as soon as possible. In its support, they are committed to reforms to achieve higher and more inclusive growth, reduce energy subsidies, and contain the civil service wage bill.

A new EFF arrangement could then build on this short-term response and support the authorities’ medium-term policy agenda to resume the macroeconomic adjustment started over 2018-19 and support growth recovery. Strong progress on both fronts will be critical to maintain debt sustainability, which worsened significantly under the weight of the Covid-19 shock. A successor arrangement could start in the second semester of 2020...

Strong fiscal consolidation over the medium term—challenging in Tunisia’s fragile socio-political context—will be unavoidable,
The government also took steps to limit fiscal pressures and reduce urgent BoP needs...
- Emergency measures on the civil service wage bill. The authorities have trimmed about TD 150 million (or 0.1 percent of GDP) from the budgeted civil service wage bill. These savings will be achieved notably through limits on hiring and promotions. Overtime hours will be reduced in areas that are not involved in the crisis response.
- Increase in tobacco prices...
- Temporary and targeted rescheduling of lower-priority public investment. The authorities will re-program low priority non-health/non-education infrastructure development projects worth about TD 3.4 billion (or 3 percent of GDP) to open space for more urgent spending. If crisis-response measures exceed the currently programmed levels, further cuts in non-priority investment would be required unless additional donor support could be mobilized.

**Letter of intent**

Our fiscal priorities to reduce our large debt burden and make our budget more supportive of growth and fairness will include the reduction of the large civil service wage bill as a percentage of GDP, the phasing out of energy subsidies, a reform of state-owned enterprises and the implementation of an effective social safety net especially for low-income households.

We commit to addressing two structural challenges that weigh heavily on Tunisia’s budgets once the current crisis abates. First, we plan to durably reduce the subsidies for electricity and natural gas while preserving social tariffs. This work stream will start with us adopting a reform strategy with the assistance of the World Bank. We will also implement a natural gas price increase after the Covid-19 crisis subsides to reduce...
Staff agrees with the authorities’ immediate crisis-response measures. Staff supports the focus on the health sector, the social safety net, and firms in distress due to the Covid-19 outbreak. It encourages the authorities to carefully cost the measures to ensure their effectiveness; and welcomes their intention to review the continued need for the measures on a monthly basis.

Staff also supports the authorities’ pro-active steps taken to increase budget space and reduce BoP pressures through... savings in the civil service wage bill, tobacco price hikes, and a temporary and targeted rescheduling of lower-priority public investment.

Achieving additional savings on the civil service wage bill will be another priority. We will start negotiations with the UGTT labor union to this effect in April 2020, including on wage policies for 2021 and the medium term; and have already started with an audit of the civil service to detect and reduce absenteeism and ghost workers. We consider all these measures critical for containing the increase in the fiscal deficit, limiting cuts in public investment to make room for crisis-related spending, and maintaining debt sustainability.

Particular measures include: (i) expanding funding for healthcare, including for medicines, the cost of quarantines, and salaries for medical employees; (ii) increasing the number of low-income families receiving social benefits; (iii) providing assistance to affected businesses via interest subsidies; (iv) financing public works to improve infrastructure and support employment; (v) temporarily reducing social contributions of individual entrepreneurs; (vi) delaying payments of the property and land taxes; (vii) and delaying 2019 income tax declarations...

The authorities are also considering ways to further reallocate expenditures (e.g. from state and local administration and other expenditures) toward healthcare, (ii) publish reports of COVID-19 related expenditures on a monthly basis on the Ministry of Finance website (www.mf.uz); (iii) publish on the Ministry of Finance website (www.mf.uz) COVID-19 related signed public procurement contracts and related documents, including the names of companies awarded those contracts and ex-post validation of delivery and will continue to improve our procurement framework expeditiously in line with international best practice, including by publishing information on beneficial owners; and (iv) ensure the Financial Control Department of the Ministry of Finance includes all COVID-19 related expenditures in its forthcoming inspections.

The Chamber of Accounts will conduct an ex-post audit of COVID-19 expenditures and related procurement processes.

Uzbekistan’s higher fiscal and external financing needs arise primarily from the COVID-19 shock and warrant a temporary loosening of fiscal and monetary policies. As the crisis abates, policies should continue to focus on ensuring fiscal and external sustainability over the medium-term:

- Regarding fiscal policy, staff supports a temporary increase in the fiscal deficit...

Over the medium-term, the government should aim to keep the fiscal deficit, including policy lending, at or below two percent of GDP.
Social protection, and investment in case the crisis deepens or lasts longer. A further temporary increase in the deficit would not undermine fiscal sustainability.

**Letter of Intent**

On the expenditure side, we estimate the additional cost of addressing the COVID-19 crisis will be UZS 15 trillion (about US$ 1.5 billion or 2.5 percent of GDP). This includes additional spending on healthcare, financial aid to the unemployed and poor, and financial assistance to affected firms and households...

Tax payments for enterprises and individuals have been postponed to a later date and tax rates have been reduced for hardest affected sectors of the economy. Moreover, all customs and taxes have been temporarily suspended for imported essential commodities. We are providing increased loan subsidies to business enterprises through the Fund for Entrepreneurial Development...

To ensure funds are spent in accordance with their purpose and procurement regulations and will publish the audit report no later than six months after the end of the fiscal year as part of the regular audit of the 2020 State Budget Report.

**Letter of Intent (reiterated in the Bangladesh IMF ED Statement)**

Once the crisis abates, the authorities are committed to bringing the fiscal deficit gradually back to 5 percent of GDP while ensuring smooth recovery of economy. We recognize that restoring fiscal discipline and debt...
dependent on daily wages. The government also intends to increase allowances for the elderly, widows and financially insolvent persons with disability, provide housing for the homeless, and develop cash transfer programs to reach the new poor. Twenty million people are expected to be the beneficiary of cash transfers. In addition, the government has announced a Tk 50 billion (US$ 0.6 billion) stimulus package for exporting industries to pay workers’ salaries.

Further, retail cash transfers to households will be channeled through bank accounts and mobile payments to ensure effective targeting and plug leakages. About 3 million mobile payment accounts have been opened to transfer wages/salaries to workers engaged in government contracted projects. The cash transfer formats to workers/households include novel designs for targeting benefits in emergencies, such as that induced by the pandemic.

auditing of COVID-19 related spending and transparency in procurement process. They will also seek to amend procurement rules to make the beneficial ownership information of awarded companies publicly available as soon as feasible.

sustainability, while allowing the government to provide the necessary public services and investment, will require an improvement in revenue performance. With the ongoing Fund technical assistance, we are determined to strengthen tax administration, reduce tax exemptions, broaden the tax base, and strengthen tax compliance.
| Maldives | Approved on April 22, 2020 | Rapid Credit Facility (RCF) SDR 21.2 million (equiv. to $28.9 million, 100% of quota) (budget support) | [https://datatopics.worldbank.org/debt/ids/DSSI MTables/M-DSSI-MDV.htm](https://datatopics.worldbank.org/debt/ids/DSSI MTables/M-DSSI-MDV.htm) | High overall risk of debt distress | **Staff Report** The fiscal policy response should focus on carefully designed non-priority spending reductions, and a reallocation of resources towards crisis-affected sectors. The authorities are scaling down the implementation of the ambitious 2020 budget public investment plans... The announced initial MVR 3.1 billion (3.7 percent of GDP) reduction in capital expenditure as well as non-priority recurrent expenditure by MVR 1 billion (1.2 percent of GDP) are steps in the right direction. Available resources need be directed to healthcare spending and other well-targeted measures needed to combat COVID-19, and provide temporary support to vulnerable households and businesses affected most by the crisis... **Letter of Intent** Given the correspondingly limited fiscal space, we will focus our response on providing the necessary funding to contain the spread of the virus and minimize the impact on... | **Staff Report (reiterated in the Letter of Intent)** The authorities have recently been taking welcome steps to improve governance, transparency... There has been a welcome renewed momentum to strengthen regulations and institutions to fight corruption, but significant work remains on the agenda. The authorities have taken steps to improve fiscal transparency, including regular publication of fiscal data, as well as improving accountability, something very important to place emphasis on during the current crisis-mitigation spending... | **Letter of Intent (reiterated in the Maldives IMF ED Statement)** The Government remains committed to fiscal consolidation to restore fiscal and debt sustainability. On the revenue side, we will monitor the implementation of our new income tax, increase as planned, after the crisis, tourism-related fees and service charges, and consider additional revenue measures as needed to support deficit reduction and to ensure fiscal and external sustainability. |
the economy and the population. We are continuously evaluating our fiscal priorities across current and capital spending, and redirecting the funds as needed to combat the coronavirus and provide temporary support to the most vulnerable households and businesses.

To minimize the impact on the people of the Maldives due to the COVID–19 virus, we have taken a set of measures on March 20, the Economic Recovery Plan, as well as more measures in recent days. In this context, the Government of Maldives will:

- Increase the amount of funds allocated to the health sector for the COVID-19 response, by MVR 200 million (0.25 percent of GDP).
- Reduce government non-priority recurrent expenditure by MVR 1 billion (1.2 percent of GDP).
- Reduce capital expenditure initially by MVR 3.1 billion (3.7 percent of GDP), while
continuing to rebalance between capital and current expenditure as necessary.

- Ensure, through banks, availability of working capital to businesses.
- Subsidize 40 percent of electricity bills and 30 percent of water bills for the months of April and May, in order to offset the economic shock on the general population, especially the poor.
- Provide special 3-month allowance to those who lose their jobs due to COVID-19.
- Enable that principal and interest amount of loan repayments to the banks will be deferred by 6 months to businesses and persons who have been negatively impacted as a direct result of COVID-19.

</table>

**Rapid Credit Facility (RCF)**  
SDR 263.2 million (equiv. to $363.6 million, 100% of quota)  
(budget support)

**High overall risk of debt distress**  

**Press Release**  
With limited scope for increasing borrowing domestically or abroad, the authorities’ economic policy response has focused on reallocating spending within the budget envelope towards health care, as well as facilitating access of unemployed workers to superannuation savings, and encouraging banks to support individuals and businesses adversely affected by the economic downturn...

**Staff Report**  
Weaker fiscal revenues are expected to lead to a fiscal financing gap of around US$ 700 million (3 percent of GDP)... The authorities have allocated additional spending needs of K645 million (0.8 percent of GDP) to address direct health expenditure and other social protection needs, including security. They aim to keep overall nominal expenditure fixed at the 2020 Budget level and divert funds from goods and services (K400 million)

**Staff Report**  
The following prior actions for the RCF have been implemented regarding COVID-related government spending:

- Details of COVID-related government procurement are being posted within one week of contracting on the government procurement website ([http://www.procurement.gov.pg/](http://www.procurement.gov.pg/)), under a special tab. As of mid-May, 14 contracts and purchases since mid-March, totaling $20.7 million, were posted. Contract and purchase details being reported include contract issuer, contract amounts, the specific nature of the goods or services procured, their price per unit (where applicable), contract recipients and beneficial owners, and validation of contract delivery;

**Staff Report**  
(reiterated in the Papua New Guinea IMF ED Statement)

The COVID-19 pandemic erupted just as the government was beginning to implement wide-ranging fiscal, foreign exchange, structural, and governance measures under a Staff-Monitored Program (SMP). The authorities have reaffirmed their commitment to these reforms...

The authorities requested a Staff-Monitored Program (SMP) in February to signal their commitment to addressing PNG’s key macroeconomic challenges. While some measures in the SMP have been implemented as planned, some quantitative targets and dates for implementation of some structural reforms will need to be recalibrated at the time of the first SMP review (June 2020). Discussions with the authorities indicate that most structural benchmarks are being met, though some have been delayed.
and capital spending (K245 million) to COVID-19 related needs...

The authorities are taking measures to mitigate the economic impact of the crisis, with a package of stimulus measures. The large majority of these measures aim to cushion the economy with monetary, financial and banking policies. Only a small part of the package (K645 million or 0.8 percent of GDP) comprises direct fiscal spending on COVID-19 needs, as the authorities are attempting to maintain the fiscal envelope of spending in the 2020 Budget, given already high debt and the limited spread of COVID-19 to date...

The fiscal strategy is to keep the current spending envelope unchanged, making reallocations within the envelope and cutting administration costs where possible. The authorities emphasized that they aim to ensure that they can address additional COVID-19 spending needs if necessary...

- Reports on procurement are now being provided to the Budget Management Committee on a weekly basis, with the first submitted on May 18.

Moreover, the authorities have committed to the following measures:
- Within three months of the end of the State of Emergency, a consolidated report on procurement will be provided to the National Executive Council;
- Within one year of the end of the State of Emergency, the government will commission and publish an audit by an independent and reputable auditor...

The government has committed to ensuring high standards of transparency and accountability for spending in by the COVID crisis...

The authorities reiterated their commitment to the SMP, noting that they have completed most of the structural benchmarks due to date with only a short delay, including the prior actions for the RCF.
relation to COVID-19... the authorities have acted to implement specific arrangements to strengthen transparency and accountability before drawing on the RCF... details of COVID-related government spending are posted on the National Procurement Commission website, and weekly reports are provided to the Budget Management Committee...

... a consolidated report will be provided to the National Executive Council within three months of the end of the State of Emergency and an independent audit completed within a year.

</tr>
</tbody>
</table>
Supported by external donors, the authorities allocated SAT22.2 million (1 percent of GDP) for health care sector, with the aim of enhancing the country’s preparedness to handle the impact of COVID-19...

The Samoan authorities’ multipronged strategy to support businesses and households amounts to SAT46 million (2.1 percent of GDP). The second supplementary budget aims to help affected businesses (SAT12.5 million) and households (SAT27.5 million), ensure food security (SAT3.5 million), and provide support to the sectors (SAT2.5 million) that provide essential services to the country, including police, education, communication, and community outreach. The strategy targets groups of vulnerable businesses and households, and provides time-bound free rent, subsidies for expenditure on utilities (electricity and water), and a moratorium on pension contributions for the hospitality sector.

We are also committed to taking additional revenue and expenditure measures to ensure debt sustainability and macroeconomic stability.
Revenue measures to support the private sector will cost the government SAT9.8 million (1⁄2 of one percent of GDP). They comprise waiver on bus and taxi registration fees, a temporary exemption on import duties on most commonly bought food items for households, and duty concessions on selected agricultural and fishing materials...

The immediate priority is to deliver the support to the most needy through social safety nets, while improving the equity, coverage, and efficiency of budget spending in due course. Provision of a subsidy on utility bills, for example, could apply a means-testing approach. Developing such a mechanism, however, takes time. Based on this experience, the authorities could set up an appropriate mechanism when possible and seek ways to address equity concerns of the subsidy, as well as broadening the coverage of social safety nets to reach households in the informal sector...

RCF disbursements will be made to
the Central Bank of Samoa. The disbursements under the RCF will address the urgent BOP financing needs, and help ensure financing of imports, including materials and equipment urgently needed in the country’s health sector.

The authorities remain committed to fiscal consolidation over the medium term as specified under the Fiscal Responsibility Act (FRA). The government activated the escape clause of the FRA after Hurricane Dorian hit the country. This allows the authorities to postpone the achievement of their fiscal consolidation targets (a fiscal deficit of 0.5 percent of GDP by FY2020/21 and a public debt-to-GDP ratio of 50 percent by FY2024/25) by four years. The COVID-19 crisis will delay reaching these targets further, but the authorities are steadfast to bring the fiscal deficit to 0.5 percent of GDP by FY2026/27 and the debt ratio to 50 percent of GDP by... |

**Approved on June 1, 2020**
FY2030/31. They will resume various measures when the pandemic fades, including the reviews of SOE governance, investment incentives, and the pension system, enhancements to public financial management (PFM) to increase expenditure control and efficiency, and revenue administration reforms...

The composition of fiscal adjustment should be carefully balanced to achieve inclusive growth, protect key public services and invest in natural disaster preparedness. Actions to achieve these objectives include containing expenditure growth by further rationalizing the wage bill, advancing the pension reform, and accelerating SOE reforms.

On the revenue side, there is significant scope to increase revenue collection by accelerating planned revenue administration reforms and streamlining tax expenditures. Increasing revenues from departure taxes, business
| Barbados Approved on June 3, 2020 | Augmentation of Extended Fund Facility (EFF) SDR 66.15 (equiv. to $91 million, 70% of quota) (budget support) | N/A | Staff Report
Revenues, particularly those related to tourism, are expected to decline substantially, leading to an overall revenue loss of about 4 percent of FY2019/20 GDP. Meanwhile expenditures will need to increase to accommodate higher health spending (about 1/4 percent of GDP in addition to 1/2 percent already spent in FY2019/20), temporary transfers to public institutions who will face pandemic-related revenue shortfalls (about 1/2 percent of GDP), and enhanced welfare schemes (about 1/4 percent of GDP)...
The expected spike in unemployment claims by individuals laid off or put on part-time schedules due to the pandemic will be managed by the National Staff Report
The authorities are also committed to safeguarding public resources, particularly those related to fend of the crisis. In particular, strengthened public procurement including audit of these crisis expenditures, publication of contracts, the names of successful bidders (and their beneficial owners) as well as ex post verification of delivery will ensure that COVID-19 related outlays will be efficiently allocated.

To support the adjustment effort over the medium and long term, a fiscal rule is expected to be introduced by mid-2021... An FAD TA mission to advise the authorities on the design of a fiscal rule, including coverage and an escape clause to accommodate the impact of natural disasters and other potential shocks, which had been scheduled for end-April 2020, had to be delayed to the second half of 2020 in light of the global coronavirus outbreak. The fiscal rule will support the planned reduction of the debt/GDP ratio to 60 percent by FY2033/34...

To secure fiscal space for investment in physical and human capital, transfers to SOEs need to continue to decline after the...
Insurance Scheme (NIS) without above-the-line impact on the budget, however, the government will support NIS liquidity by repurchasing up to BRB$250 million bonds currently held by the NIS. The Government intends to seek Parliamentary approval of a fiscal rule to enhance fiscal transparency, and lock in the gains of fiscal consolidation... We will design a sound fiscal rule defining coverage, implementation, corrective mechanisms, escape
| Bolivia | Rapid Financing Instrument (RFI) | N/A | **Staff Report**
The authorities intend to fully accommodate the health care spending needed to mitigate the impact of the COVID-19 pandemic on the health and well-being of the population. The authorities also anticipate a need to increase social safety net spending to protect the most vulnerable. Active efforts are underway to shift fiscal resources from other lower-priority programs to accommodate these needs while containing the fiscal deficit to 7.3 percent of GDP in 2020...

The near-term reallocation of expenditures, including the temporary recourse to central bank funding to cover a portion of the deficit, is warranted by the immediate medical, humanitarian, | **Letter of Intent**
... we commit to adhere to best practices in procuring and awarding contracts related to the pandemic (including by publishing regularly documentation on procurement contracts on the government’s website, together with ex-post validation of delivery along with the name of awarded companies and the name of their beneficial owners) as well as publishing an external independent audit report on virus-related expenditures once the crisis is over. | **Staff Report**
The authorities are committed to eliminating macro-fiscal imbalances over the medium term, once the immediate health crisis and associated economic effects have begun to wane...

**Public Debt Sustainability Assessment**
The authorities are addressing the COVID-19 shock with additional temporary spending financed by re-prioritization of expenditures, a drawdown in deposits, central bank loans, and donor loans. The medium-term fiscal consolidation path is realistic, while the authorities envisage even a more ambitious tightening through streamlining public spending while increasing its efficiency.
and economic needs prompted by the crisis. At the same time, it will be important, in light of the limited fiscal space available, to protect other social welfare spending. Should health spending needs prove larger than expected, some limited margin for maneuver may be gained through additional reductions in public investment...

Staff projections assume that the spread of the disease will be contained at moderate levels and activity will resume relatively rapidly as the health crisis begins to wane. However, the situation could evolve along a more negative trajectory. Should this occur, additional measures to strengthen domestic health services and provide support to vulnerable populations would be needed. These would be partially covered by the identified contingency measures of bringing forward planned reductions in SOE investments, while also being supported by additional external financing...

**Letter of Intent**

We are also committed, if needed and once the immediate health crisis has passed, to taking additional income and expenditure measures to ensure our fiscal position is consistent with the availability of financing and to underpin the continued sustainability of our public debt position.
Letter of Intent
We have already announced plans to rapidly strengthen the capacity of our medical system, particularly in the handling of emergency respiratory cases. Beyond these direct steps to target public health priorities, we have also announced steps to support those most vulnerable among our population, including direct relief payments to vulnerable households with children, reductions in some utility fees, and a moratorium on the payments of debts owed by households and firms. We anticipate these spending needs alone will add 1.8 percent of GDP to our fiscal deficit at a time when activity is slowing markedly and revenue sources are being compromised as taxpayers struggle to manage their own difficult circumstances. With much of our medical equipment imported from other countries, these expenditures directly translate into upward pressures on our trade deficit.

During the course of the epidemic

the crisis; targeted support to SMEs... and a possible targeted moratorium on the payment of loan principal and/or interest for the most affected sectors for at least 8 weeks (only for personal, housing, vehicle, consumer, and education loans, and to debtors who suffered layoffs, suspension of employment contract or cuts in working hours)... 

While the health system is relatively better prepared among regional peers, the additional health-related spending could increase further as confirmed virus cases grow.

Overall, total spending is expected to increase by about 2.4 percent of GDP, driven by the provision of social transfers to the most affected sectors and individuals (about 1 percent of GDP), medical spending (about 0.3 percent of GDP), and the impact of lower growth. As a result, the primary and overall fiscal deficit for 2020 would widen to 4.8 percent and 9.8 percent of GDP respectively...

the 2018 fiscal reform, must be preserved...

Staff welcomes the authorities’ stated commitment to the fiscal consolidation path and immediate efforts to contain the impact of the pandemic by reprioritizing spending, including through the announced public wage freeze for 2020 and contemplating additional compensatory measures. Starting from 2021, and once the economy recovers from the pandemic, staff recommends ending all the emergency spending measures and reapplying the fiscal rule.
While the government has created a contingency fund for the COVID-19 emergency of about 3.2 percent of GDP for higher-than-expected emergency spending needs, reallocating spending away from non-essential expenditures toward priority areas, such as social assistance or capital spending to close infrastructure gaps, could help save scarce resources.

**Costa Rica IMF ED Statement**
... the authorities have implemented some (and are proposing other) compensatory fiscal measures, such as suspension of salary increases for public employees (except health workers and the police), a temporary surcharge on income taxes, and the use of retained earnings from public sector entities to reduce central government debt.

The government also undertook temporary tax administration measures such as extending deadlines for filing tax declarations...

The authorities would need to allocate more resources to health and social benefits, including by redirecting budgetary appropriations from other areas...

Staff estimates conservatively that central government expenditures could be 1 1/4 percent of GDP higher than before the shock. The government needs to ensure that these public spending measures are both targeted and temporary, focusing on protecting those most vulnerable to the shock and on supporting demand. With that goal over.

All public purchases are subject Law 340-06 (2006), which adhere to strict principles of efficiency, competition, transparency, equity, responsibility, morality and good faith, and make public servants liable for not following the law. Law 340-06 establishes special rapid procedures in case of emergencies like COVID-19. To that end, the government issued decrees 87-20 and 133-20 (2020) for purchases related to the fight against COVID-19. Under these emergency procedures, the law establishes, inter alia, the publication of requirements and all documents related to emergency purchases, as well as requiring each institution that used these emergency procedures to issue reports of their operations to the General Comptroller Office and the Accounts Chamber and to publish these reports in their

**Letter of Intent**

Specifically, to ensure that public debt-to-GDP ratios remain sustainable and on a clear downward path in the medium-term, we are committed to a gradual tightening of fiscal policies once the pandemic recedes. Beyond the medium-term fiscal consolidation outlined above, we are committed to strengthening our public financial management to ensure effective oversight over the entire public sector, including state-owned enterprises. We will also consider carefully the recommendation by IMF staff to establish a medium-term fiscal framework.
in mind, the authorities should allow automatic stabilizers, including support for the unemployed and means-tested transfers...

The authorities recognize the mounting fiscal pressure from unbudgeted current expenditure—namely on healthcare needs and the announced fiscal stimulus measures—while at the same time facing declining receipts, especially from consumption taxes. They plan to reallocate resources from other budget items and reduce 2020 capital expenditure to ongoing high-priority projects. The authorities do not foresee granting tax exemptions but are providing relief by allowing postponements and incremental payments of income taxes.

| Ecuador | Rapid Financing Instrument (RFI) | SDR 469.7 million (equiv. to $643 million, 67.3% of quota) (budget support) | N/A | Staff Report | The rapid spread of COVID-19 in Ecuador—and the attendant domestic disruptions—is expected to increase public spending by US$600 million (0.6 percent of GDP)...

|   |   | about US$350 million (0.35 percent of GDP), though the estimated health costs vary widely (from US$100 million to US$800 million), depending on the speed of the spread of the virus, hospital spare capacity, and mitigating measures implemented by the authorities... Higher health spending could help contain the spread of the disease and mitigate its social impact though capacity constraints may restrict its effectiveness.  
  - Additional social assistance spending of about US$250 million (0.25 percent of GDP). The shock is likely to have severe labor market repercussions given that the sectors most affected by the crisis are labor-intensive and often with a significant degree of informality. The health crisis is widely expected to affect more disproportionately the vulnerable groups of society. In consultation with the World government’s website COVID-19-related public procurement contracts and related documents, including the names of the awarded companies and their beneficial owners and ex-post validation of delivery, as well as information on all other COVID-19 related spending; and (ii) undertaking an independent audit of COVID-19-related spending by the Office of the Comptroller General by mid-2021 and publishing the results. | ambitious, yet credible, fiscal consolidation after pressures from the crisis subside will be needed to anchor public debt sustainability and strengthen the country’s resilience to shocks. Even before the current crisis, strengthening the fiscal position was an important objective of the government... | Ecuador IMF ED Statement  
Over the medium term, the authorities intend to embark on a
Bank, staff estimates that additional cash transfers will be needed to provide temporary relief to the vulnerable population, which can help mitigate the impact of the virus on the poor...

On March 19th, the authorities announced several measures to support the population and businesses, including a deferral of payroll contributions, an exceptional cash transfer amounting to US$120 (in April and May) to 400 thousand poor families, distribution of food baskets, and credit lines for small-and medium-size businesses...

Increasing public health spending combined with mitigation measures will play a central role in helping Ecuador manage the health and economic impact of the crisis. Staff and the authorities agreed that increasing health spending to mitigate the spread of the coronavirus and treat those that require medical assistance are fiscal consolidation plan once the pandemic subsides. The planned adjustment amounts to an increase of 6 percent of GDP of the non-oil primary balance including fuel subsidies until 2025, supported by credible and robust measures to boost non-oil revenues and reduce spending. This adjustment will form the core of the forthcoming EFF program.
Given the financing constraints, it will be critical to transparently allocate the increased health spending to the type of interventions that may be most effective at managing the outbreak. This implies that spending on the activities required to monitor the incidence of the virus, contain its spread, and mitigate its health impact should aim to upgrade existing capacity as needed (for example, number of intensive care beds, stock of respirators or other necessary equipment). Staff recommended careful costing of these activities and sound estimates of human and financial resources available to implement them, including external resources that could be mobilized, and taking into consideration the need to maintain other essential health services...

The authorities are committed to protecting vulnerable groups that might be affected by both the health and the economic crisis. Cash
transfers could play a powerful role in protecting vulnerable households, so that the loss of income does not prevent them from accessing necessities (food, medicine, utilities). Staff recommended expanding the recently announced cash transfer “Bono de Protección Familiar por Emergencia” of US$120 per family currently designated to 400,000 families, to all of the families currently listed in the social registry (about 2 million families). Additional cash transfers to poor households that are not listed in the social registry but identified through other mechanisms could be distributed using non-bank correspondents and payments through ATMs (cajeros electrónicos) without electronic card. Given the low coverage of the social registry, an in-kind provision of goods and services can also be considered...

While these temporary measures can help cushion the most vulnerable households from the impact of the shocks, a more fundamental reform of the social
A protection system is needed. To this end, in line with the commitments under the cancelled 2019 EFF, and as a reflection of the overarching importance the authorities place on protecting the well-being of the poor and the vulnerable, the authorities have developed an action plan—with inputs from both the World Bank and the Fund—to implement social assistance thresholds and upgrade the social registry. This plan, which will help increase coverage and improve targeting of the social assistance, is also an important safeguard that would help ensure that resources from the RFI are used in the most effective way...

There is also a need to support the spending capacity of households who lose income and to support firms to keep paying their workers and to start up production again after the crisis passes. The emergency law submitted to the National Assembly on April 16 contains a temporary relaxation of the eligibility criteria for
unemployment insurance as well as modifications to the labor contracts aimed at protecting jobs and permitting flexible work schedules...

Staff supports income measures the government has submitted as part of an emergency package to the National Assembly, with the tentative view to generate additional savings of 1.9 percentage points of GDP. The measures are needed to ensure sufficient resources for the emergency health and social assistance spending. This includes: (i) a temporary solidarity contribution of 5 percent of corporate profit tax by companies with revenues above US$1 million; and (ii) a temporary solidarity contribution from wages, which will be paid by both private and public sector employees. In addition, the Ministry of Economy and Finance has issued guidelines to the highest authorities of all public entities for the second quarter of 2020, which includes a hiring freeze, except for priority sectors, non-renewal of occasional and provisional contracts

| mortgages, consumer loans and credit cards have been deferred for a three-month period. | most vulnerable, including VAT refunds.
- A decrease in current spending by (i) reducing the wage bill (e.g., hiring freeze, early retirement of public employees,) and (ii) centralizing procurement across ministries and public sector agencies.
- Additional measures of $\frac{1}{3}$ percent of GDP in 2024, either on revenues or current spending.

... fiscal risks stem from a deterioration in the fiscal position, if the temporary increase in spending caused by the anti-pandemic measures becomes permanent, or if there is a larger loss in revenues in 2020 than presently envisaged. If such risks materialize, there is some room to compress capital spending somewhat further. For 2021, staff recommends reversing the increase in spending due to emergency measures for about US$900 million in order to preserve fiscal sustainability... |
The authorities have rightly allowed a temporary widening of the fiscal deficit to accommodate necessary health spending and other crisis mitigation measures, and are appropriately committed to safeguarding fiscal sustainability. Staff strongly supports the authorities’ commitment to allow the temporary crisis measures to lapse and to implement a gradual fiscal adjustment of 3 percent of GDP in permanent measures over 2021-24, once the pandemic subsides. Such a commitment is in line with the proposed gradual fiscal adjustment strategy recommended by staff to reach a primary fiscal balance of 3¾ percent of GDP by end-2024, which also would ensure compliance with the Fiscal Responsibility Law.

mostly fiscal measures to mitigate the impact of COVID-19, which envisions:

(i) increased health care spending (with the initial increase in health spending estimated at 0.2 percent of GDP);

(ii) government payroll support to the affected sectors and individuals;

(iii) expansion of government employment programs and unemployment benefits; and

(iv) reduced or deferred payment of some taxes and social contributions.

The package’s cost is estimated at 2 percent of GDP, assuming that the measures are in place for 3 months, as announced by the authorities.

The broader fiscal policy stance is reflected in the supplementary budget that was approved on April 17. In addition to internalizing the above package, the budget includes 2.2 percent of GDP in contingencies liabilities...

...takes hold, the FRL’s escape clause should be withdrawn (with the timing of the withdrawal dependent on the duration of the shock), requiring that the primary surpluses return to, or rise above, the 3 1/2 percent of GDP floor... This strategy should be supported by fiscal adjustment measures, if needed, and a recalibration of the spending growth rule to internalize a withdrawal of the temporary outlays that were used to address the COVID-19 pandemic.
for health and related spending as well as social protection to address the fall-out from a possible worsening of the pandemic. Concurrently, the fiscal stance also includes a smaller but more realistic capital expenditure allocation that prioritizes numerous small projects geared at supporting employment at the community level for which funding was secured pre-2020.

In this context, the authorities have temporarily invoked the Fiscal Responsibility Law (FRL) “public health epidemic” escape clause to accommodate the fiscal effects of the crisis, which would pave the way for additional measures should these be necessary.

| **Staff Report** |
| The authorities have strengthened procurement rules for a proper use of financing resources. MINFIN swiftly adopted regulations under the State of Calamity to ensure that all pandemic-related expenses are channeled through the government e-procurement system (Guatecompras) and adequately reported in the dedicated budgetary program. The launch of the State of Calamity dashboard is a welcome initiative to enhance the accountability and control of all COVID-related expenditures. |
| To further ensure the transparent and effective use of resources, the authorities should publish: (i) quarterly reports of COVID-19 related expenditures on the website of the Ministry of Public Finance and all related signed procurement contracts |

| **Staff Report** |
| Amid still-rising infections and extended containment measures, tax collections and other public revenues may suffer by more than under staff’s projections, further widening the financing gap. To mitigate this risk, the Fund is providing technical assistance to the authorities in the formulation of a business continuity plan for the tax agency during and post-COVID... |
| During the COVID-19 crisis, the tax authority should focus on executing a revenue administration continuity plan that carefully tracks taxpayer deferrals and expedited refund payments—which staff supports to provide liquidity to firms and to preserve employment. During the recovery, the authorities should focus on reducing VAT and corporate income tax gaps... |
| The authorities’ budgetary priority post-COVID is to rebuild their financial buffers for disaster |
approved three budgetary modifications involving a sizable fiscal support...

The fiscal package steps up healthcare spending (0.2 percent of GDP), provides temporary relief to vulnerable sectors to the pandemic (cash and other transfers of 1.2 percent of GDP), salary subsidies (0.3 percent of GDP), funding to firms (0.6 percent of GDP), and other budget allocations to strengthen the provision of public services (1 percent of GDP) ...

Staff recommends stepping up the deployment of temporary testing and treatment facilitates in rural areas lacking healthcare coverage.

Guatemala IMF ED Statement
Guatemala’s Government is strongly committed to swiftly return to the fiscal consolidation from 2021 onwards, the fiscal balance is expected to improve through a reduction in the deficit to 3.0 percent of GDP in 2021 and continue its gradual adjustment to reach the historic average (2 percent of GDP) in the following years. In that vein, the authorities recognize that more progress is required on the revenue side to strengthen capacity of the tax administration and gradually broaden the tax base. They continue fully committed to the revenue mobilization agenda that will increase fiscal space to foster growth and reduce poverty over the medium term.
Approved on April 13, 2020

Rapid Credit Facility (RCF) SDR 81.9 million (equiv. to $111.6 million, 50% of quota) (budget support)
CCRT grant SDR 4.10 million (equiv. to $5.61 million)

**Staff Report**

On the fiscal front, the country would encounter:
(iv) additional direct health, medical, security, and social expenditures to address the virus impact; and
(v) an expected decline in fiscal revenues as a share of GDP by 0.6 percentage points, to a level 3.0 percent of GDP below the FY2016-FY2018 average...

The government announced additional health care spending and transfers to support workers and households, including paying the salaries for one month of most teachers and professors, paying 50 percent of salaries of workers in the textile sector, providing cash transfers and food rations to households, and providing subsidies to the transport and sanitation sectors. These measures are estimated at 1.6 percent of GDP...

Staff encouraged the authorities to build on the draft “Politique Nationale de Protection et de Promotion Sociale” (PNPPS) to:

- **Staff Report**

Staff stressed the importance of enforcing standard budget execution procedures and reporting regarding the spending chain, starting with COVID-19 expenditures. This would support the general improvement of standard budget procedures and also help the administration keep track, record, and publish monthly all expenditures incurred on an emergency basis so as to limit the risk of misuse of public funds.

The authorities agreed to prepare monthly budget execution reports on all COVID-19 expenditures and also to undertake a thorough ex-post financial and operational audit of COVID-19-related operations. This would strengthen sustainable reforms of budget processes, provide assurances on the use of external financing, and help the authorities improve the

**Staff Report**

Looking forward, the authorities have committed to implement a reform program with the support of a Staff Monitored Program (SMP) framework that will include policies to strengthen the fiscal and monetary policy frameworks, improve tax administration and public finance management, tackle governance weaknesses and corruption, and focus in particular on a few concrete measures to build a coherent social safety net...

Efforts to strengthen the policy framework are expected to continue with the support of an SMP. The government’s program would focus on: (i) restoring macroeconomic stability and the seeds of growth and employment; (ii) building a better social safety net; and (iii) improving governance and combatting corruption.

On social policies, the SMP should support implementation of the
support their policy response to COVID-19...

The authorities have worked with staff to prepare a credible budget framework for FY2020. As there has been no budget law passed since 2017/18, this notional budget is needed to guide policies and manage cash needs in the absence of a sitting parliament to approve a budget law. New spending on health, social programs, and security is expected to reach 1.6 percent of GDP and Treasury-funded domestic public investment could rise by 0.5 percent of GDP, albeit from a low base in FY2019.

**Letter of Intent**

To prevent a further downward spiral of our economy and the well-being of our citizens, our government has undertaken various measures, including but not limited to:

- Cash transfers to 1,500,000 families.
- Distribution of dried food rations to vulnerable operational efficiency of emergency responses in the future...

Staff urge the authorities to carefully track, record, and publish all expenditures related to the emergency response. Accurate and transparent recording and accountability with respect to the allocation of financing assistance would be important to build public confidence.

In this regard, staff welcome the authorities’ commitment to continue to advance governance and anti-corruption reforms... In particular, their proposal to report monthly on COVID-19 expenditures and undertake an ex-post COVID-19 financial and operational audit of the expenditure response is encouraging. This would help strengthen public financial management transparency and accountability while new national plan PNPPS (not yet approved), continue to expand coverage of the social registry (SIMAST), establish an effective governance structure for social spending, and advance Fintech reforms to help distribute cash transfers and deepen financial inclusion...

The authorities have indicated their intention to cooperate with the Fund and pursue economic policies appropriate for addressing the impact of COVID-19. As noted above, Haiti is expected to undertake discussions for a six month SMP arrangement in the coming weeks with the goal of advancing after that to a comprehensive upper credit tranche-quality economic reform program aimed at lifting Haiti out of fragility and on a path toward stronger growth, employment and poverty reduction.

As part of the immediate response to the COVID-19 shock in March, this included an additional allocation of 0.1 percent of GDP for medical equipment and training for healthcare workers and an increase in the contingency reserve of 0.1 percent of GDP...

The budget in early March reset the primary surplus target for FY2020/21 and outer years from 6.5 to 5.4 percent of GDP... This reduction comprised 0.6 percent of GDP in permanent tax cuts and, in the wake of the COVID-19 shock, additional spending of nearly 0.5 percent of GDP to support the COVID Allocation of Resources for Employees (CARE) program, aimed at providing temporary income support to workers, grants to

Staff Report
The authorities intend to continue to adhere to best practices in procurement and contract awards related to the pandemic. All public sector purchases are subject to the policies and guidelines under the Public Procurement Act of 2015, which adheres to the principles of transparency, fairness, integrity and ensuring public confidence in procurement processes, even for emergency-related fast-track procedures. Both the Integrity Commission and the Auditor General’s Department are empowered to undertake any audit of public procurement.

Specifically, the authorities

Staff Report
They [the authorities] remain fully committed to continuing their medium- term debt reduction efforts, but recognize the national emergency warrants a temporary reduction of the primary surplus. This will, in turn, lead to a modest (two-year) delay in achieving the Fiscal Responsibility Law’s goal of bringing debt down to 60 percent of GDP, although they are committed to accelerate these efforts, should growth overperform.
businesses, and social assistance payments to vulnerable segments of the population.

The authorities are further revising their primary surplus target for FY2020/21 to 3.5 percent of GDP. A supplementary budget will be submitted to Parliament in May, to account for the expected revenue shortfalls (notably in travel and accommodation taxes) and necessary spending reallocations to meet the urgent needs arising from the effects of the pandemic.

To finance the increased fiscal needs, the government intends to redirect resources from delayed capital projects and less urgent programs toward essential spending priorities and rely on available cash buffers, built in part from the proceeds of recent divestment of public assets (including the Wigton Wind Farm and Trans-Jamaican Highway).

**Jamaica IMF ED Statement**

In order to support the most plan to make publicly available key information on procurement contracts, including beneficial ownership information of awarded companies, and request that the Auditor General’s Department undertakes and publishes an ex-post audit of COVID-related spending. Moreover, the CARE program is subject to multiple verification processes that require beneficiaries to register using their tax identification numbers and through a transparent online portal with relevant authorities.
impacted segments of the population, the government has introduced targeted measures in the form of a J$ 16 billion spending stimulus under the COVID-19 Allocation of Resources for Employees (CARE) Program. The Program includes (i) temporary cash transfers to registered businesses in targeted sectors based on the number of workers employed; (ii) transfers to individuals who lost their employment on or after March 10; and (iii) grants targeted at the most vulnerable segments of society.

mitigate the impact on the private sector, Paraguay has... increased health care and social safety net spending. In late March, congress passed an emergency package with some 2.4 percent of GDP in measures, of which about 1.3 percentage point was for additional health care spending, 1.0 percentage point for social safety nets (including for informal sector workers) and the remainder for emergency loans for small enterprises.

**Paraguay IMF ED Statement**

In March, Congress passed an emergency law with 2.4 percent of GDP worth in measures. These resources are planned to be allocated especially to the health sector (USD 515 million) and social protection (USD 408 million), while the remaining amount will be used for the operation of the State, that is, for transitory subsidies of some public services, and for loans to Micro, Small, and Medium-sized Enterprises.

commitments to ensure that related expenditures authorized by the emergency law are subject to robust budgetary procedures. The court of accounts of Congress, the office of the Comptroller, and the anti-corruption Secretariat will perform an audit of all crisis-mitigation spending and make it available to the public. These steps aim to enhance the transparency and accountability of the state regarding the use of public funds.

budget deficit is appropriate. In the short run, the priority is to increase spending on health care and the social safety net, as well as to provide support to small businesses and workers. Once the crisis abates, the budget deficit will need to be reduced, and Paraguay should reestablish its fiscal rule, which has successfully anchored macroeconomic stability in the past five years...

**Letter of Intent**

The government of Paraguay recognizes the paramount importance of continued macroeconomic stability and healthy and sustainable public finances. We therefore intend to return the fiscal deficit to below the ceiling of 1.5 percent of GDP after the crisis is over. Given the highly uncertain economic prospects at this time, the precise time schedule will be determined at the time the 2021 budget is prepared. If growth is stronger than expected, we will use the additional revenue to return the deficit to below the...
To keep the deficit below the ceiling and create room for additional investment, we will moderate current expenditure growth and increase revenues. We plan to revise the Fiscal Responsibility Law to limit real growth of primary expenditure to 2 percent down from 4 percent previously. We will also aim for further increases in tax revenue, which is only 10 percent of GDP. A recent tax reform will boost tax revenue by 0.1 percent of GDP in 2020 and 0.7 percent of GDP until 2023, but more may be needed.

In the medium term, growth is...
time during the period of the arrangement (one or two years), and subject to a mid-term review in two-year FCL arrangements.

Disbursements are not phased nor conditioned on compliance with policy targets as in traditional IMF-supported programs. This large, upfront access without ex-post conditionality is justified by the very strong track records of countries that qualify for the FCL, which gives confidence that their economic policies will remain strong.

The authorities are requesting a two-year FCL addressing the health emergency; (ii) providing economic relief to vulnerable firms and households; and (iii) ensuring a rapid economic recovery once the health emergency is over.

**COVID-19 Policy Measures**

**Fiscal Policy**

**Package equivalent to 7 percent of GDP**

- Increased spending in health equipment and personnel
- Temporary payroll subsidies, tax deferrals, and means-tested cash transfers
- Post-lockdown recovery projects
- Emergency lending to small and medium-sized enterprises
- Efforts to ease liquidity constraints on households

**Package equivalent to about 8 percent of GDP**

- Government guarantee to support financial sector lending to some 350,000 SMEs for working capital. Guaranteed

Controls under the framework of the COVID-19 emergency have been reinforced by enabling the Comptroller’s Office to conduct concurrent monitoring. Transparency has also been strengthened with online eligibility for social support programs by citizens... expected to return to its potential of 3 1/2 percent) and the fiscal deficit to gradually decline to below the fiscal rule ceiling—one year later than in the pre-Covid-19 path. The return to the debt ceiling of 30 percent of GDP may, however, need a longer period...

While the medium-term fiscal adjustment and the return to the numerical parameters of the fiscal rule will be to a large extent the result of the dissipation of temporary support policies and of higher tax collection associated to the economic recovery, it will be nonetheless key for the authorities to complement this process by continuing to focus on revenue administration measures—particularly on reducing the VAT compliance gap...

Staff Report

As the recovery sets in, fiscal policy will need to be tightened to place public debt back on a downward path. Revenues will be supported by the rebounding of economic activity and crisis-related expenditures can be phased out, reducing the budget deficit to about 4-5 percent of GDP in 2021.
of the population are properly supported. The government, with World Bank assistance, will start consolidating social programs into the existing guaranteed minimum income (GMI) program, and gradually increase the minimum subsistence level. Progress is also being made in linking databases to enhance the verification of beneficiaries of various social assistance programs.

**Memorandum of Economic and Financial Policies (Attachment to the Letter of Intent)**

**2020 supplementary budget.** Since the approval of the budget, the macro-economic outlook has worsened dramatically due to outbreak of the COVID-19 virus. To respond to this emergency, we have adopted a supplementary budget (*an update to the prior action*), which allows the deficit of the general government to expand to UAH 300 billion (about 8 percent of GDP), taking into account the large fall in revenues due to the decline in activity, as well as the additional expenditures efficient...

The operations of the fund will be governed by regulations issued by Cabinet of Ministers of Ukraine (CMU) reflecting transparency and accountability requirements. These government regulations will cover:

(i) the procedures for re-allocating resources to the fund; (ii) the authorization processes for committing the resources of the fund, allocating a central role to the Minister of Finance; (iii) the budget execution rules that will be followed; (iii) the detailed monthly reporting to be filed with the CMU and parliament on the use of funds in the previous period; (iv) the requirement that all cash transactions of the fund have to be executed through and reported by the Treasury; (v) the rules for discontinuing the operations of the fund, including the use of any further ahead, fiscal consolidation will need to be supported by broadening the tax base, strengthening revenue administration, and rationalizing current expenditures, to achieve primary surpluses of about 1–11/2 percent of GDP—implying an overall deficit of around 21/2 percent of GDP by 2023. This should gradually return public debt to close to 50 percent of GDP by 2025 and ensure medium-term fiscal sustainability.

**Memorandum of Economic and Financial Policies (Attachment to the Letter of Intent)**

We will work with IMF staff to develop in 2020 proposals to reform our tax system and make the tax system more growth friendly, including by addressing tax gaps, broadening the tax base, and reducing opportunities for tax avoidance, with a view to shift taxation from direct taxes to indirect taxes and the taxation of wealth. We will not
spending needs to respond to the crisis.

On the revenue side, the fiscal package provides support to households and small entrepreneurs by raising the thresholds for businesses to qualify for the simplified tax regime, a temporary exemption from tax fines and penalties for delays in filing tax returns, land and property taxes, and the unified social tax; as well as through a temporary moratorium on tax audits and inspections.

Medicines and medical devices used to prevent or combat COVID-19 infections have been exempted from import duties and VAT.

On the expenditure side, expenditures on health care, pensions, and social protection were increased by about 3 percent of GDP, partially offset by a reduction in capital and non-priority current expenditures.

remaining resources and responsibility for commitments active at the time of the fund’s closure.

An ex-post procurement audit of the COVID-19 program will be conducted by the State Audit Service of Ukraine, in consultation with external/third party auditors, of all transactions conducted under the rules of CMU resolution 302 at the time of closing the fund but no later than 12 months after its establishment (a structural benchmark for end-March 2021).

We will also prepare a detailed progress report regarding disbursements and commitments of the fund by program and economic classification within 30 days of the Fund’s closure. These reports will be made public, in full, at the time of their completion.

enact any legislation during the program period that changes our tax system such that it will undermine fiscal sustainability. Moreover, during the program period we will refrain from introducing new tax exemptions or privileges (except for the already approved exemptions that are implemented for COVID-related healthcare expenditures), including tax–free zones, and preferential rates and duties, and further earmarking of revenues (except for the expenditure of the fund for COVID-related spending).
A temporary cap was introduced on all public sector wages and salaries, including those in other state bodies and state-owned entities. This cap is to be lifted by end-June, as containment measures are gradually eased. Should further burden-sharing be needed, we will explore other mechanisms for efficient redistribution. The increases in pensions will take the form of: (i) an advanced date of indexation of pensions, and (ii) one-off additional pension payments to low-income pensioners and elderly pensioners (80 years or older). To administer these expenditures the government has created a temporary budget program, the fund for COVID-related spending...

Furthermore, we will publish all procurement notices in a manner readily accessible to the general public and will make all purchase orders, including information on beneficial owners of the participating bidding companies, electronically accessible to the public on the ProZorro internet site (https://prozorro.gov.ua). The fund will operate only until the emergency situation so requires, but not beyond 31 December 2020.

| The approved supplementary budget envisions the establishment of the budget program “Fund to Fight Against COVID-19 and its Impact”... The fund will be used primarily for the purpose of financing additional health care and social expenditures directly related |
the COVID-19 epidemic.
